Operating profit includes investment returns at the expected long-term rate of return but excludes amortisation of goodwill and the profit on sale of UK general business operations. The directors believe that operating profit, as adjusted for these items, better reflects underlying performance. Profit on ordinary activities includes these items together with actual investment returns. This basis of presentation has been adopted consistently throughout the Preliminary Announcement.

Basis of Preparation of Results

The achieved profits basis results have been prepared in accordance with the guidance issued by the Association of British Insurers in December 2001 "Supplementary Reporting for long-term insurance business (the achieved profits method)".

Under this guidance, the basis for setting long-term expected rates of return on investments and risk discount rates are, for most countries, set by reference to period end rates of return on fixed income securities. This "active" basis of assumption setting has been applied in preparing the results of the Group's UK, US, and European long-term business operations. For the Group's Asian operations, the active basis is appropriate for business written in Japan and Korea and for US dollar denominated business written in Hong Kong.

An exception to this general rule is that for countries where long-term fixed income markets are underdeveloped, investment return assumptions and risk discount rates are based on an assessment of long-term economic conditions. Except for the countries listed above, this basis is appropriate for the Group's Asian operations.

The key economic assumptions are set out below:

	2002	<u>2001</u>
UK Operations		
Pre-tax expected long-term nominal rate of investment return:		
UK equities	7.0%	7.5%
Overseas equities	7.0% to 7.8%	7.5% to 7.8%
Property	6.75%	7.5%
Gilts	4.5%	5.0%
Corporate bonds	5.5%	6.0%
PAC with-profits fund assets		
(applying the rates listed above to the investments held by the fund)	6.6%	7.1%
Expected long-term rate of inflation	2.5%	2.6%
Post-tax expected long-term nominal rate of return:		
Pension business (where no tax applies)	6.6%	7.1%
Life business	5.7%	6.3%
Risk margin included within the risk discount rate	2.6%	2.6%
Risk discount rate	7.1%	7.7%
Prudential Europe		
Risk discount rate	7.1%	7.7%
US Operations (Jackson National Life)		
Expected long-term spread between earned rate and rate credited to policyholders	1.75%	1.75%
US 10 year treasury bond rate at 31 December 2002 (2001)	3.9%	5.1%
Risk margin included within the risk discount rate	3.1%	2.6%
Risk discount rate	7.0%	7.7%
Prudential Asia		
Weighted pre-tax expected long-term nominal rate of investment return	7.1%	7.3%
Weighted expected long-term rate of inflation	3.0%	3.0%
Weighted risk discount rate	9.6%	10.1%

The Prudential Asia weighted economic assumptions have been determined by weighting each country's assumptions by reference to the Achieved Profits basis operating results for new business written in the relevant year.

Notes on the Unaudited Achieved Profits Basis Results

- (1) The achieved profits basis results are unaudited. The results for 2001 have been derived from the achieved profits basis supplement to the Company's statutory accounts for that year. The supplement included an unqualified review report from the auditors.
- (2) Under the achieved profits basis, the operating profit from new business represents the profitability of new long-term insurance business written in the year and the operating profit from business in force represents the profitability of business in force at the start of the year with, for Asia, the statutory basis results of non-insurance operations. These results are combined with the statutory basis results of the Group's other operations including banking, mutual funds and other non-insurance investment management business. In the directors' opinion, the achieved profits basis provides a more realistic reflection of the performance of the Group's long-term business operations than results under the statutory basis.
- (3) The proportion of surplus allocated to shareholders from the UK with-profits business has been based on the present level of 10%. Future bonus rates have been set at levels which would fully utilise the assets of the with-profits fund over the lifetime of the business in force.
- (4) The Company completed the transfer of its UK general business operations to Winterthur and the Churchill Group, its subsidiary, on 4 January 2002 for a consideration of £353m. After allowing for the costs of sale and other related items, the profit on sale was £355m before tax.
- (5) The final dividend of 17.1p per share will be paid on 28 May 2003 to shareholders on the register at the close of business on 21 March 2003. A scrip dividend alternative will be offered to shareholders. The total dividend for the year, including the interim dividend of 8.9p per share paid in 2002, amounts to 26.0p per share and the total cost of the dividend declared in respect of 2002 is £519m.
