

CLIMATE & HEALTH RESILIENCE FUND

The Climate & Health Resilience Fund (CHRF) aims to allocate US\$2 million to empower Prudential's businesses to address health challenges arising from climate change, fortifying communities and fostering resilience for a safer, sustainable future. This strategic initiative is aligned to support Prudential's Sustainability objectives and our climate adaptation agenda.

Objectives of the fund

IDEATE AND SUPPORT
PROTECTIVE AND
PROACTIVE MEASURES

ADDRESS
CLIMATE-RELATED HEALTH
RESILIENCE ISSUES

SAFEGUARD
FAMILIES, COMMUNITIES
AND ECONOMIES

WORK ACROSS
ASIA & AFRICA

What is the context?

- Climate change is directly contributing to humanitarian emergencies from heatwaves, wildfires, floods, tropical storms and hurricanes that are increasing in scale, frequency and intensity.
- Research shows that 3.6 billion people already live in areas highly susceptible to climate change. The direct damage costs to health is estimated to be between US\$2 and 4 billion per year by 2030.
- Areas with weak health infrastructure – mostly in developing countries – will be more at risk.
- Reducing emissions of greenhouse gases through better transport, food and energy use choices can result in very large gains for health, particularly through reduced air pollution.

Facts

Launched

March 2024

Budget

US\$ 2 million
