

# Group Environment Policy

## Objective

The aim of this Policy is to provide, for all employees and others affected by our activities, an outline of our overall approach to environmental matters as they relate to our operational premises portfolio, business travel and supply chain. Our objective as a Group is to manage the environmental impact from the properties we occupy and work to promote sustainability and environmental awareness at all levels of decision making.

## Principles

Prudential seeks to minimise its environmental impact and prevent unnecessary environmental damage. The Group commits to:

- Comply with local environmental compliance obligations as they relate to our operations;
- Implement risk management systems that assess the environmental impact of our operations and seek to prevent pollution and ensure continual improvement;
- Measure the greenhouse gas emissions associated with our operations;
- Set targets to improve our performance globally and encourage the implementation of energy, water efficiency and waste measures into the premises we occupy and promote waste minimisation, re-use, recovery and recycling;
- Seek to use renewable sources of energy where commercially feasible;
- Measure our material travel impacts and seek to reduce the greenhouse gas emissions associated with these impacts;
- Encourage our suppliers and business partners, to adopt good environmental practices and where appropriate, collaborate with them on solutions to mitigate our own impacts;
- Raise staff awareness of their role in adopting environmentally responsible behaviours;
- Take into consideration environmental matters, including energy efficiency and the use of natural resources, in the planning, property and lease acquisition, development, refurbishment and decommissioning of our buildings; and
- Support initiatives in our sector and collaborate with others to deliver a more sustainable future.
