THE PRUDENTIAL ASSURANCE COMPANY LIMITED

DIRECTORS' REPORT FOR THE YEAR ENDED 31 DECEMBER 2008

Principal activity

The principal activity of the Company is transacting long-term insurance business in the United Kingdom. The Company also owns a number of insurance subsidiary undertakings and a branch in Hong Kong that transact insurance business in the United Kingdom and overseas. These activities will continue in 2009.

The Company itself is a wholly owned subsidiary undertaking of another company registered in England and Wales and therefore group financial statements and a group business review are not prepared. Accordingly, the financial statements and the following business review present information about the Company as an individual undertaking and are not consolidated.

Business review

Market review and strategy

The Company's long-term products consist of life insurance, pension products and pension annuities. In common with other UK long-term insurance companies, the Company's products are structured as either with-profits (or participating) products, or non-participating products including annuities in payment and unit-linked products. Depending upon the structure, the level of shareholders' interest in the value of policies and the related profit or loss varies. With-profits policies are supported by the with-profits sub-fund and can be single or regular premium. The return to shareholders on virtually all with-profits products is in the form of a statutory transfer to the Company's shareholders' funds which is analogous to a dividend from the Company's long-term fund and is dependent upon the level of bonuses credited or declared on policies in that year. There are two types of bonuses – "annual" and "final". Annual bonuses are declared once a year, and are determined as a prudent proportion of the long-term expected future investment return on the underlying assets. Once credited, annual bonuses are guaranteed in accordance with the terms of the particular product. In contract, "final" bonuses are only guaranteed until the next bonus declaration, and are primarily determined on the actual smoothed investment return achieved over the life of the policy. With-profits policyholders currently receive 90 per cent of the distribution from the with-profits sub-fund as bonus additions to their policies and shareholders receive 10 per cent as a statutory transfer.

The defined charge participating sub-fund (DCPSF) forms part of the Company's long-term fund and comprises the accumulated investment content of premiums paid in respect of the defined charge participating with-profits business issued in France, the defined charge participating with-profits business reassured into the Company from Prudential International Assurance plc and Canada Life (Europe) Assurance Ltd and the with-profits annuity business transferred to the Company from the Equitable Life Assurance Society on 31 December 2007. All profits in this fund accrue to policyholders in the DCPSF.

There is a substantial volume of non-participating business in the with-profits sub-fund and its wholly owned subsidiary Prudential Annuities Limited (PAL), which is closed to new business; profits from this business accrue to the with-profits sub-fund. The Company also writes non-participating business, the profit on which accrues solely to shareholders, and this business is written in the Company's non-profit sub-fund.

In 2008 in the UK, the Company continued to focus on realising value from the opportunities created by rapid growth in the need for retirement solutions. The Company targets and competes in selected areas of the UK pre and in-retirement markets, and during 2008 the Company has demonstrated considerable resilience in a very challenging environment. The Company remains confident about the long-term growth prospects for the UK retirement market.

The UK is characterised by an ageing population and the concentration of wealth in the mass affluent and high net worth sectors - a combination that positions the retirement and near-retirement segments as the fastest growing in the marketplace. Low savings rates and high levels of consumer debt, coupled with an increasing shift in responsibility for providing retirement income away from Government and employers towards individuals, have resulted in individuals in the UK being inadequately provided for during increasingly long periods of retirement.

The Company has a unique combination of competitive advantages including its longevity experience, multi-asset capabilities, brand and financial strength. These put the Company in a strong position to pursue a value driven strategy that generates attractive returns.

THE PRUDENTIAL ASSURANCE COMPANY LIMITED

DIRECTORS' REPORT FOR THE YEAR ENDED 31 DECEMBER 2008 (continued)

In order to achieve its focus, the Company's UK operations are structured into two primary business units:

- Retail Life & Pensions
- Corporate Solutions

The Retail Life & Pensions business unit provides Retail Retirement solutions to customers and intermediaries by capitalising on the Company's retirement expertise, people and brand.

The Corporate Solutions business unit provides Corporate Pension solutions and works with insurance companies and businesses to help them manage their financial risk.

The Company distributes products through both direct and intermediated channels. The direct channel primarily focuses on capturing internal pension vestings. The indirect channel distributes products through retail intermediaries, strategic partners and through Employee Benefit Consultants and consulting actuaries. Participation within the intermediary market is selective, concentrating on those advisers who focus on value and building client relationships. Significant progress is being made in growing the sales teams and improving productivity. In addition, the Company is focusing on developing deeper and better relationships with key accounts and through partnership relationships and has been successful in gaining a number of new panel positions since the beginning of 2008.

The Company has a significant pipeline of internal vestings annuity business from maturing individual and corporate pension policies, which is expected to remain at least at the current level until 2025. In the key area of with-profits annuities, the Company can bring its core manufacturing strengths to bear while also capitalising on people's need for protection from inflation through increasingly long periods of retirement. The Company has been operating in the UK with-profits annuity market since 1991 and is now the market leader with a market share of over 85 per cent.

Given the UK's compulsory annuitisation age of 75, an increasingly sophisticated consumer population, and the rising incidence of second careers and semi-retirement as a result of increasing longevity, the market has seen good growth in the "bridge" between pensions and annuities through income drawdown products. The Company launched its new income drawdown product in late 2007 and this product helps customers manage their pension through the various stages of retirement, and also offers flexibility whilst providing potential for capital growth.

Within corporate pensions the Company will continue to look for growth from its existing Defined Contribution Schemes, refresh its contract-based Defined Contribution proposition, and build its presence with a number of new scheme wins.

The Company's with-profits business performed particularly strongly during 2008. With-profits, when invested in an actively managed, well-run and financially strong fund like the Company's, continues to be an attractive medium to long-term investment, offering annualised returns which compare favourably with other investment options.

Sales of PruFund, the Company's unitised and smoothed investment plan, were particularly strong during the year. Since October 2008, PruFund has been available across the Company's range of tax wrappers, including individual pensions, income drawdown and onshore and offshore bonds. The Company launched the new PruSelect range of unit-linked funds across its pensions and investment products, more than doubling the number of funds available.

Sales growth across the Company's with-profits range has been achieved on the back of sustained strong investment performance in its Life Fund over a number of years, reflecting the benefits of its diversified investment policy. The Company believes this market will continue to see further growth as investors turn to trusted and financially strong brands and products offering an element of capital protection.

In the wholesale market, the Company aims to participate selectively in bulk annuity and back-book buyouts, where it is able to win business based on its financial strength, superior track record and annuitant mortality risk assessment capabilities. In the bulk annuity and insurer back-book market the Company maintains a strict focus on value, and will only participate in transactions that meet its return on capital requirements based on its view of longevity improvement. There continues to be a significant pipeline of potential wholesale deals but competition remains intense with a number of market participants competing for the business.

THE PRUDENTIAL ASSURANCE COMPANY LIMITED

DIRECTORS' REPORT FOR THE YEAR ENDED 31 DECEMBER 2008 (continued)

In 2007, Prudential Group, of which the Company is a part, announced an agreement with Capita to outsource a large proportion of its in-force and new business policy administration, which is an important element in achieving the Group's UK business total cost savings target. The agreement commenced in April 2008. The contract helps deliver the long-term cost savings strategy by removing fixed costs from the business and achieving significant operating efficiencies. The Capita contract also provides a significant reduction in long-term expense risk by providing certainty on per-policy costs as the number of policies in the mature life and pensions book decreases over the coming years.

The Company's Hong Kong Branch is a leading life insurer and one of the most trusted and respected brands in the Hong Kong market. The branch is dedicated to meeting the different needs of its customers by providing a comprehensive range of insurance services. The range of products include life insurance, general insurance, employee benefits, investment, health and protection products supported by outstanding customer service. Retirement and health are currently two key strategic initiatives to help Hong Kong people lead financially secure lives and to meet customer need for increased medical protection.

Risks & uncertainties

As a provider of insurance services, the Company's business is the managed acceptance of risk. The Company is a wholly owned subsidiary of the Prudential Group and is subject to the Group's internal control and risk management processes as detailed in the Group Governance Manual and Group Risk Framework. The control procedures and systems established within the Group are designed to manage, rather than eliminate, the risk of failure to meet business objectives. They can only provide reasonable and not absolute assurance against material misstatement or loss, and focus on aligning the levels of risk-taking with the achievement of business objectives.

The Group's risk governance framework requires all business and functions within the Group, including the Company, to establish processes for identifying, evaluating and managing key risks. The risk governance framework is based on the concept of three lines of defence: Risk management, risk oversight and independent assurance.

The key risks and uncertainties affecting the Company are as follows:

- 1) The business is inherently subject to market fluctuations and general economic conditions.
 - a) Uncertain or negative trends in international economic and investment climates which have adversely affected the Company's business and profitability could be repeated or prolonged, or could worsen. The adverse effect of such trends, including the unprecedented market dislocation across asset classes and geographical markets witnessed since mid-2008, have been and would be felt principally through the following:
 - reduced investment returns could impair its ability to write significant volumes of new business as a result of market volatility, which would have a negative impact on the Company's assets under management and profit;
 - higher credit defaults and wider credit and liquidity spreads resulting in realised and unrealised credit losses, as recently experienced when illiquidity and credit spreads reached all-time highs;
 - the Company, in the normal course of business enters into a variety of transactions, including derivative transactions with counterparties. Failure of any of these counterparties to discharge their obligations, or where adequate collateral is not in place, could have an adverse impact on the Company's results; and
 - in certain illiquid or closed markets, determining the value at which financial instruments can be realised is highly subjective. Processes to ascertain value and estimates of value require substantial elements of judgment, assumptions and estimates (which may change over time). Increased illiquidity also adds to uncertainty over the accessibility of financial resources and may reduce capital resources as valuations decline.
 - b) A significant part of the Company's shareholders' profit is related to bonuses for policyholders declared on its with-profits products, which are broadly based on historic and current rates of return on equity, property and fixed income securities, as well as the Company's expectations of future investment returns. For all lines of business, fluctuations in financial risk factors will

THE PRUDENTIAL ASSURANCE COMPANY LIMITED

DIRECTORS' REPORT FOR THE YEAR ENDED 31 DECEMBER 2008 (continued)

affect the Company's results. In 2008, the Company has had to operate against a challenging background of unprecedented volatility in capital and equity markets, interest rates and widespread economic uncertainty.

- 2) The Company conducts its business subject to regulation and associated regulatory risks, including the effects of changes in laws, regulations, policies and interpretations and accounting standards in the markets in which it operates.
 - a) Changes in government policy, legislation or regulatory interpretation applying to companies in the financial services and insurance industries, which in some circumstances may be applied retrospectively, may adversely affect the Company's product range, distribution channels, capital requirements and, consequently reported results and financing requirements. For instance, regulators in jurisdictions in which the Company operates may change the level of capital required to be held by individual businesses. Also these changes could include possible changes in the regulatory framework for pension arrangements and policies, the regulation of selling practices and solvency requirements. Furthermore, as a result of the recent interventions by governments in response to global economic conditions, it is widely expected that there will be a substantial increase in government regulation and supervision of the financial services industry, including the possibility of higher capital requirements, restrictions on certain types of transaction structure, and enhanced supervisory powers.
 - b) The UK operates investor compensation schemes that requires mandatory contributions from market participants in some instances in the event of a failure of a market participant. As a major participant in the majority of its chosen markets, circumstances could arise where the Company, along with other companies, may be required to make additional material contributions.
 - c) Any further changes or modification to Financial Reporting Standards may require a change in the reporting basis of future results, or a restatement of reported results.
- 3) The resolution of several issues affecting the financial services industry could have a negative impact on the Company's results or on its reputation or on its relations with current and potential customers.
 - a) The Company is, and in the future may be, subject to legal and regulatory actions in the ordinary course of its business. This could be a review of business sold in the past under previously acceptable market practices at the time such as the requirement to provide redress to certain past purchasers of pension and mortgage endowment policies, changes to the tax regime affecting products and regulatory reviews on products sold and industry practices, including in the latter case businesses it has closed.
 - b) Regulators are moving towards a regime based on principles-based regulation which brings an element of uncertainty. Regulators are increasingly interested in the approach that product providers use to select third-party distributors. In some cases product providers can be held responsible for the deficiencies of third-party distributors.
- 4) Litigation and disputes may adversely affect the Company's profitability and financial condition.
 - a) The Company is, and in the future may be, subject to legal actions and disputes in the ordinary course of its insurance, investment management and other business operations. These legal actions and disputes may relate to aspects of the Company's businesses and operations that are specific to the Company, or that are common to companies that operate in the UK markets. Legal actions and disputes may arise under contracts, regulations or from a course of conduct taken by the Company, and may be class actions. Although the Company believes it has adequately provisioned in all material aspects for the costs of litigation and regulatory matters, no assurance can be provided that such reserves are sufficient. Given the large or indeterminate amounts of damages sometimes sought, and the inherent unpredictability of litigation and disputes, it is possible that an adverse outcome could, from time to time, have an adverse effect on the Company's results of operations or cash flows.

THE PRUDENTIAL ASSURANCE COMPANY LIMITED

DIRECTORS' REPORT FOR THE YEAR ENDED 31 DECEMBER 2008 (continued)

- 5) The Company's business is conducted in a highly competitive environment with developing demographic trends and the Company's continued profitability depends on management's ability to respond to these pressures and trends.
- a) The market for UK financial services is highly competitive with several factors affecting the Company's ability to sell its products and its continued profitability, including price and yields offered, financial strength and ratings, range of product lines and product quality, brand strength and name recognition, investment management performance, historic bonus levels, developing demographic trends and customers' appetite for certain savings products.
 - b) The Company's principal competitors in the life insurance market include many of the major retail financial services companies including, in particular, Aviva, Legal & General, Lloyds Banking Group and Standard Life.
 - c) The Company believes competition will intensify in response to consumer demand, technological advances, the impact of consolidation, regulatory actions and other factors. The Company's ability to generate an appropriate return depends significantly upon its capacity to anticipate and respond appropriately
- 6) Downgrades in the Company's financial strength and credit ratings could significantly impact its competitive position and hurt its relationships with creditors or trading counterparties.
- a) The Company's financial strength and credit ratings, which are intended to measure its ability to meet policyholder obligations, are an important factor affecting public confidence in its products, and as a result its competitiveness. Changes in methodologies and criteria used by rating agencies could result in downgrades that do not reflect changes in the general economic conditions or the Company's financial condition. Downgrades in ratings could have an adverse effect on the Company's ability to market products and retain current policyholders. In addition, the interest rates the Company pays on its borrowings are affected by its debt credit ratings, which are in place to measure the Company's ability to meet its contractual obligations.
 - b) The Company's financial strength is rated Aa1 (rating under review for possible downgrade) by Moody's, AA+ (negative outlook) by Standard & Poor's and AA+ (stable outlook) by Fitch as at 31 December 2008.
- 7) Adverse experience in the operational risks inherent in the Company's business could have a negative impact on its results of operations.
- a) Operational risks are present including the risk of direct or indirect loss resulting from inadequate or failed internal and external processes, systems and human error or from external events. The Company's business is dependent on processing a large number of complex transactions across numerous and diverse products, and is subject to a number of different legal and regulatory regimes. In addition, the Company outsources several operations, including a significant part of its back office and customer-facing functions as well as a number of IT functions. In turn, the Company is reliant upon the operational processing performance of its outsourcing partners.
 - b) Further, because of the long-term nature of much of the Company's business, accurate records have to be maintained for significant periods. The Company's systems and processes incorporate controls which are designed to manage and mitigate the operational risks associated with its activities as any weakness in the administration systems, finance systems and processes or actuarial reserving process could have an impact on its results during the effective period. The Company has not experienced or identified any operational risks in its systems or processes during 2008, or which have subsequently caused, or are expected to cause, a significant negative impact on its results of operations.
- 8) Adverse experience against the assumptions used in pricing products and reporting business results could significantly affect the Company's results of operations.
- a) The Company needs to make assumptions about a number of factors in determining the pricing of its products and for reporting the results of its long-term business operations. For example, the assumption that the Company makes about future expected levels of mortality is particularly relevant for its annuity business. In exchange for a premium equal to the capital value of their accumulated pension fund, pension annuity policyholders receive a guaranteed

THE PRUDENTIAL ASSURANCE COMPANY LIMITED

DIRECTORS' REPORT FOR THE YEAR ENDED 31 DECEMBER 2008 (continued)

payment, usually monthly, for as long as they are alive. The Company conducts rigorous research into longevity risk, using data from its substantial annuitant portfolio. As part of its pension annuity pricing and reserving policy, the Company assumes that current rates of mortality continuously improve over time at levels based on adjusted data from the Continuous Mortality Investigations (CMI) medium cohort table projections as published by the Institute and Faculty of Actuaries. If mortality improvement rates significantly exceed the improvement assumed, the Company's results of operations could be adversely affected.

- b) In common with other industry participants, the profitability of the Company's businesses ultimately depends on a mix of factors including mortality and morbidity trends, policy surrender rates, investment performance, unit cost of administration and new business acquisition expense.
- 9) Adverse experience in other parts of the Group could significantly affect the Company's results.
- a) Group risk is present from the consequences of risks arising from other parts of the Group in addition to those risks arising from the Company's own activities. The independent capitalisation of the Company as well as the risk management processes and internal control mechanisms within the Company ensure Group risk is appropriately managed.

Performance and measurement

The results of the Company for the year as set out on pages 12 to 14, show a profit on ordinary activities before tax of £555m (2007: £1,308m). 2008 profits have increased by £188m (51%), after excluding the one-off profit of £941m made in 2007 on the transfer of Prudential Assurance Company Singapore (Pte) Limited to a fellow company within the Prudential Group, Prudential Singapore Holdings Pte Limited. The increase in 2008 is primarily due to a reinsurance agreement entered into with Prudential Retirement Income Limited (PRIL) on 31 December 2008. The arrangement is a 15% quota share reinsurance, with deposit back, on all of PRIL's net retained liabilities. This arrangement generated £179m of profit for the Company. In 2008 the Company received £44m (£2007: £4m) from its arrangement with Churchill; in 2002 the Company transferred its general insurance business to Churchill and since then has received commission payments for the Prudential-branded general insurance products, and this year the arrangement resulted in a net payment to the Company of this amount.

The shareholders' funds of the Company total £3,237m (2007: £3,290m restated).

Sales on an APE basis (Regular Premiums plus 1/10th Single Premiums) are up from £929m in 2007 to £1,134m in 2008. 2008 APE includes £239m APE arising from the 15% quota share reinsurance arrangement with PRIL, mentioned above. Excluding this transfer in 2008 and the £170m APE arising in 2007 from the transfer of Equitable Life business to the Company, the increase in APE in 2008 is 18%. Sales growth has been mainly driven by very strong growth in with-profits bonds. This strong sales growth reflects the strength of the Company's with-profits offering and a growing demand for this type of product as consumers are increasingly looking to protect themselves from market downturns, especially when invested in an actively-managed, well-run and financially strong fund. PruFund, the Company's unitised and smoothed investment plan made a significant contribution to the with-profits sales growth. Since October 2008, this product has been available across the Company's range of tax wrappers including individual pensions, income drawdown, onshore and offshore bonds and is now paneled across almost all the major UK retail banks. The Company also launched its PruSelect range of unit-linked funds across its pensions and investments products, more than doubling the number of funds available. Individual annuity sales were in line with 2007, despite volatile market conditions. Corporate pension sales benefited from strong sales from existing schemes.

The Company's With-Profits Fund is the largest and one of the financially strongest in the UK, continuing to cover comfortably all its regulatory solvency requirements. The Fund is supported by an Inherited Estate of £5.4bn (as at 31 December 2008) which provides the working capital required to support the Fund for the long-term benefit of current and future policyholders.

THE PRUDENTIAL ASSURANCE COMPANY LIMITED

DIRECTORS' REPORT FOR THE YEAR ENDED 31 DECEMBER 2008 (continued)

Despite difficult conditions in financial markets throughout 2008, the Company's With-Profits Life Fund investment performance compares favourably with industry indices as the table below indicates.

Fund/Index	2008 Performance
Prudential Assurance Company Ltd With-Profits Fund (before tax)	-19.7%
Prudential Assurance Company Ltd With-Profits Fund (after tax)	-15.8%
FTSE All-Share index (total return)	-29.9%
FTSE 100 index (total return)	-28.3%
ABI UK – Balanced (up to 85% Equity) Managed-Life Fund	-19.2%
ABI UK – Cautious (up to 60% Equity) Managed-Life Fund	-16.0%
IPD Property	-22.5%

Underlying investment performance over the last five and ten years is shown in the table below and demonstrated that the Company's With-Profits Fund has consistently outperformed the market.

Fund/Index	5 Years	10 Years
Prudential Assurance Company Ltd With-Profits Fund (gross cumulative return)	31.7%	67.2%
FTSE All-Share index (total return)	18.7%	12.4%
FTSE 100 index (total return)	18.3%	3.2%
ABI UK – Balanced (up to 85% Equity) Managed-Life Fund	14.3%	12.3%
ABI UK – Cautious (up to 60% Equity) Managed-Life Fund	7.0%	11.3%

The table below shows the asset mix of the Company's with-profits fund:

	2008	2007	2006
	per cent	per cent	per cent
UK equities	34	35	36
International equities	17	17	17
Fixed interest	29	28	25
Property	14	14	15
Alternative investments	5	3	3
Cash and other assets classes	1	3	4
Total	100	100	100

The Company's financial strength is rated Aa1 (rating under review for possible downgrade) by Moody's, AA+ (negative outlook) by Standard & Poor's and AA+ (stable outlook) by Fitch as at 31 December 2008.

The Company does not report against Key Performance Indicators in its Business Review. This is because the Company is part of the wider Prudential Group and the Group's business is managed on a divisional basis such as UK Insurance Operations and Prudential Asia. Key Performance Indicators exist for the management of the divisions, of which this Company's business forms a part. The divisional Key Performance Indicators can be found in the Annual Report of Prudential plc.

THE PRUDENTIAL ASSURANCE COMPANY LIMITED

DIRECTORS' REPORT FOR THE YEAR ENDED 31 DECEMBER 2008 (continued)

Corporate responsibility

The Company is a wholly owned subsidiary within Prudential plc and corporate responsibility (CR) is a philosophy that is firmly embedded in Prudential's operations around the world and has become a fundamental and integral part of how the Company does business. Strong commitment to CR reflects the recognition that stakeholders — including customers, employees, shareholders and communities — increasingly favour companies that embrace and exhibit sound values around trust, ethics and environmental responsibility. As the Company strives to meet this need, it is helped by the fact that these values have been fundamental to Prudential throughout the past 160 years, underpinning the long-established brand values of reliability and stability. At the same time, it is recognised that performance in key areas of CR such as corporate governance, environmental management and employment practices can have a significant and positive impact on financial performance.

The Group, of which the Company is a part, has developed a Group Governance Framework which is underpinned by a Group Governance Manual and associated processes. This encompasses all key policies and procedures for example the Group Code of Business Conduct, the CR policy and Health and Safety Policy. The Company remains committed to providing a high level of customer service, communicating openly with customers, providing clear information and to monitoring levels of satisfaction.

There is a Responsibility Committee which is a specialist Group-wide committee and has responsibility for reviewing Prudential's business conduct and social and environmental policy, and ensures consistency of approach across the Group's international businesses. The CR team develops Prudential's CR strategy and works closely with individual business units to provide advice. The team also assists with the development and adaptation of Group-wide initiatives so that they not only fit with overall Group principles but are also adapted to meet local needs.

Subsidiary undertakings and branches

Particulars of the Company's principal subsidiary undertakings at 31 December 2008 are shown on page 40 in note 15. At 31 December 2008 the Company had a branch outside the United Kingdom in Hong Kong.

With-profits governance

The Company produces an annual report, which is available on request, setting out how it has complied with its Principles and Practices of Financial Management (PPFM).

The Board has established a With-profits Committee (WPC), made up of three members (each of whom is external and independent of the Company). The WPC provides the Board with an independent assessment of the way in which the Company manages its with-profits business, its compliance with the PPFM, and how the Company balances the rights and interests of policyholders and shareholders in relation to its with-profits funds. The WPC has the right, if it wishes, to make a statement to with-profits policyholders in addition to the Company's report described above.

The Company has a With-Profits Actuary who has the specific duty to advise the Board on the application of discretion in relation to with-profits business; and an Actuarial Function Holder who will provide the Board with all other actuarial advice. Both of these are Financial Services Authority approved roles.

Post balance sheet events

The Prudential Group, of which the Company is a part, is currently subject to the solvency requirements of the Insurance Groups Directive (IGD) as implemented by the Financial Services Authority (FSA). The IGD group solvency position as at 31 December will be submitted to the FSA by 30 April 2009. At the time of preparing these financial statements the Group's surplus capital, under the IGD test of capital adequacy, was estimated to be £1.7bn (before allowing for the 2008 final Prudential plc dividend) which comprises £1.4bn of the Group's IGD surplus at 31 December 2008 plus an additional £0.3bn which the FSA has, after the year end, allowed the Group to include in its IGD surplus going forward as a result of an innovative structure the Group has developed. The £0.3bn additional capital reflects the ability to

THE PRUDENTIAL ASSURANCE COMPANY LIMITED

DIRECTORS' REPORT FOR THE YEAR ENDED 31 DECEMBER 2008 (continued)

realise a portion of the shareholders' economic interest in the future transfers from the Company's with-profits fund. This additional capital is not reflected in the results of the Company.

Accounts

The state of affairs of the Company at 31 December 2008 is shown in the balance sheet on pages 16 and 17. The profit and loss account appears on pages 12 to 14.

Share Capital

Changes in the Company's share capital during 2008 are shown on page 42 in note 22.

Dividends

Interim dividends of £282m and £200m (2007: £288m) on the ordinary shares were paid on 8 May and 22 December 2008 respectively. The directors have not declared a final dividend on the ordinary shares for 2008 (2007: £Nil).

A dividend on the A preference shares of £29,165 was paid on 8 May 2008 (2007: £30,366). No dividend was paid on any other preference shares.

Payment policy

The Company does not follow any code or standard on payment practice with its suppliers but it is the policy of the Company to agree terms of payment when orders for goods or services are placed and to pay in accordance with those terms. Trade creditor days, based on the ratio of amounts which were owed to trade creditors at the year end to the aggregate of the amounts invoiced by trade creditors during the year, were 21 days (2007: 22 days).

Directors

The present directors are shown on page 1.

Mr T C Thiam was appointed a director of the Company on 14 April 2008. Mr P A J Broadley and Mr G P J Shaughnessy resigned as directors on 15 April and 25 September 2008 respectively. There were no other changes during the year. Mr F A O'Dwyer was appointed as a director on 15 January 2009.

Political and Charitable Donations

There were no payments to Przeworski Foundation in 2008 (2007: £193,496), the final instalment of a five year funding programme having been made in 2007.

During 2008 the Hong Kong branch made donations of £28,761 (2007: £35,831) as follows: £17,708 was donated to Hong Kong Red Cross, The Hong Kong Liver Foundation £8,598 and Family and Child Welfare Services under The Community Chest of Hong Kong £2,455. All donations are categorised as Social and Welfare.

No donations were made for political purposes.

Disclosure of information to auditor

The directors who held office at the date of approval of this directors' report confirm that, so far as they are each aware, there is no relevant audit information of which the Company's auditor is unaware; and each director has taken all the steps that he ought to have taken as a director to make himself aware of any relevant audit information and to establish that the Company's auditor is aware of that information. This confirmation is given and should be interpreted in accordance with the provisions of section 234ZA of the Companies Act 1985.

THE PRUDENTIAL ASSURANCE COMPANY LIMITED

DIRECTORS' REPORT FOR THE YEAR ENDED 31 DECEMBER 2008 (continued)

Financial instruments

The Company is exposed to financial risk through its financial assets, financial liabilities, and policyholder liabilities. The financial risk factors affecting the Company include market risk, credit risk and liquidity risk. Information on the financial risk management objectives and policies of the Company and the exposure of the Company to the financial risk factors is given in note 32 (E) on page 60.

Further information on the use of derivatives by the Company is provided in note 32 (C) on page 57.

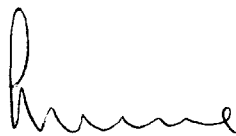

Auditor

The members of the Company appointed KPMG Audit Plc as auditor of the Company by ordinary resolution on 6 May 2008. An ordinary resolution of the Company for the re-appointment of KPMG Audit Plc as auditor of the Company will be proposed to the members of the Company in accordance with Section 485(4) of the Companies Act 2006.

Directors' and officers' protection

Prudential plc has arranged appropriate insurance cover in respect of legal action against directors and senior managers of companies within the Prudential Group. In addition, the Articles of Association of the Company provide that every Director, Manager, Secretary and other officer or servant of the Company shall be indemnified by the Company against, and it shall be the duty of the Directors out of the funds of the Company to pay to him, all costs, losses and expenses which he may incur or become liable to by reason of any contract entered into or any act or deed done by him as such officer or servant or in any way in the discharge of his duties. Prudential plc also provides protections for directors and senior managers of companies within the Group against personal financial exposure they may incur in their capacity as such. These include qualifying third party indemnity provisions (as defined by the relevant Companies Act) for the benefit of directors of Prudential plc (being Messrs Tucker, Prettejohn and Thiam) including, where applicable, in their capacity as a director of the Company and other companies within the Group. These indemnities were in force during 2008 and remain in force.

On behalf of the Board of directors.

S D Windridge
Secretary
26 March 2009

M E Tucker
Chairman

THE PRUDENTIAL ASSURANCE COMPANY LIMITED

Accounting Policies

A. Change in accounting policies

The Company has implemented the following changes in preparing its results for the year ended 31 December 2008. These standards closely reflect the requirements of International Financial Reporting Standards (IFRS) and form part of the continuing convergence of IFRS in the UK.

UITF 44. 'Group and Treasury Share Transactions'

UITF 44, 'Group and Treasury Share Transactions' which is an interpretation of FRS 20, 'Share-based Payment' became effective in 2008. UITF 44 clarified that the accounting in the financial statements of a subsidiary for share-based payment transactions settled in its parent company's shares depends on whether the Company or the parent company grants the share options and awards to the employees of the Company.

Where the share options and awards are granted by the parent company, such share-based payment is treated as being equity-settled with the Company recording a compensation expense with a corresponding credit to equity to the value of the share-based payment in accordance with FRS 20. Where the share options and awards are granted by the Company, such share-based payment is treated as being cash-settled with the Company recording a compensation expense with a liability recognised on the balance sheet for the fair value of the accrued amount at the balance sheet date.

Previously, the Company had recognised all of its group share-based transactions as being equity-settled. As a result of the adoption of UITF 44, certain share-based transactions are now treated as cash-settled. As at 31 December 2008, an amount of £3m was recorded in Other Creditors for these cash-settled share-based payment transactions. The 2007 comparatives have also been adjusted accordingly for the adoption of UITF 44 with a reclassification of £2m credit from Equity to Other Creditors for the cash-settled transactions. There is no impact to the profit or loss of the Company.

Amendments to FRS 26 (IAS 39) and FRS 29 (IFRS 7): Reclassification of Financial Assets

In October 2008, the Accounting Standards Board (ASB) approved the 'Amendments to FRS 26 (IAS 39) and FRS 29 (IFRS 7): Reclassification of Financial Assets' that permit the reclassification of certain 'held for trading' and 'available-for-sale' financial assets into the 'loans and receivables' category carried at amortised cost if specific conditions are met and additional disclosures are made regarding any assets so reclassified. The adoption of these amendments to FRS 26 'Financial instruments: recognition and measurement' and FRS 29 'Financial instruments: disclosure' did not have an impact on the balance sheet or profit and loss account of the Company as the Company has not made any such reclassification of financial assets as permitted by the amendments.

B. Basis of Preparation

The financial statements are prepared in accordance with the provisions of Section 255 of, and Schedule 9A to, the Companies Act 1985. The financial statements comply with applicable accounting standards and the ABI SORP, and have been prepared under the historical cost accounting rules, modified to include the revaluation of investments.

As the Company is a wholly owned subsidiary undertaking of another company registered in England and Wales, group financial statements are not prepared. Accordingly, the financial statements present information about the Company as an individual undertaking and are not consolidated.

The Company has taken advantage of the exemption under FRS1 (Revised) 'Cash flow statements' from preparing a cash flow statement. The Company has not presented a capital position statement with supporting disclosures under FRS 27 'Life Assurance' on the basis that the Company is more than 90 per cent owned within a group and the Company is included in the publicly available Prudential plc group financial statements which provide information on a group basis complying with this requirement.

THE PRUDENTIAL ASSURANCE COMPANY LIMITED

Accounting Policies (continued)

C. Long-term Business

The measurement basis of assets and liabilities of long-term business contracts is dependent upon the classification of the contracts under FRS 26 as either insurance contracts, if the level of insurance risk is significant, or investment contracts if the risk is insignificant. A further distinction is made between investment contracts with and without discretionary participation features. Discretionary participation features represent the contractual right to receive additional profit-sharing benefits as a supplement to guaranteed benefits. The Company's insurance contracts and investment contracts with discretionary participation features are primarily with-profits and other protection type or annuity policies. The investment contract without discretionary participation features classification applies primarily to certain unit-linked and similar contracts written by the Company. Insurance contracts and investment contracts with discretionary participation features are accounted for under previously applied UK GAAP, as set out in the ABI SORP. Investment contracts without discretionary participation features are accounted for as financial liabilities under FRS 26 and, where relevant the provisions of the ABI SORP in respect of the attaching investment management features of the contracts. FRS 26 applies a different accounting treatment to these contracts than the previously applied UK GAAP primarily in respect of deferred acquisition costs, deferred income reserves and provisions for future expenses commonly called "sterling reserves" (see below).

A further feature is that investment contracts without discretionary participation features are closer in nature to a deposit style arrangement between the investors and the Company. Premiums and withdrawals for these contracts are recorded within the balance sheet as a movement on the investors' liability and the long-term business technical account reflects the fee income, expenses and taxation on the contracts. The provisions for investment contracts without discretionary participation features are included in Technical Provisions for Linked Liabilities in the balance sheet.

Technical account treatment:

Premiums and annuity considerations for conventional with-profit policies and other protection type life insurance and annuity policies are accounted for when due. For unit-linked business and unitised with-profit policies, premiums are accounted for when the liabilities arising from the premiums are created. Premiums exclude any taxes or duties based on premiums. Pensions annuity contracts that vest during the year are included in claims incurred and premium income at the annuity purchase price.

Claims paid include maturities, annuities, surrenders and death. Maturity claims are accounted for on the policy maturity date. Annuity claims are accounted for when the annuity becomes due for payment. Surrenders are accounted for when paid and death claims when notified.

Under FRS 26, the accounting treatment for investment contracts without discretionary participation features reflects the deposit nature of the arrangement with premiums and claims reflected as deposits and withdrawals taken directly to the balance sheet as a movement on the investors' liability with the long-term technical account reflecting fee income, expenses and taxation on these contracts.

The costs of acquiring new non-profit insurance contracts, principally commission and certain costs associated with policy issue and underwriting, which are not matched by policy charges are capitalised and amortised against margins in future revenues on the related insurance contracts for non-profit business to the extent that the amounts are recoverable out of margins.

Under FRS 26, for the investment contracts without discretionary participation features, only the incremental, directly attributable acquisition costs relating to the securing of investment management element of the contracts can be capitalised and amortised in line with related revenue. If these contracts involve up-front charges, this income is also deferred and amortised through the technical account in line with contractual service provision.

Sterling reserves, as defined above, are not permitted to be recognised under FRS 26 for investment contracts.

Bonus additions made to policies are included in the change in the long-term business provision or, where the policy is no longer in force, in claims incurred.

Profits comprise actuarial surpluses allocated to shareholders adjusted, other than for with-profits business, for the deferral of acquisition costs and movements in the shareholders' interest in reserves held within long-term funds. For with-profits business, unappropriated surplus is carried forward in the

THE PRUDENTIAL ASSURANCE COMPANY LIMITED

Accounting Policies (continued)

fund for future appropriations and no allocation is made to the shareholders. There is no deferral of acquisition costs for with-profits business.

The fund for future appropriations comprises amounts arising in relation to participating policies and other non-linked policies, the allocation of which to policyholders or to shareholders has not been determined at the balance sheet date.

The assumptions used to calculate the long-term business provisions are described in note 30.

The Company applies FRS 27, which impacts the basis of reporting for the with-profits business provisions. FRS 27 is underpinned by the FSA's Peak 2 realistic basis of reporting.

Realistic reserves are established using best estimate assumptions, and taking into account the firm's regulatory duty to treat its customers fairly.

The FSA realistic value of liabilities is calculated as:

- (i) a with-profits benefits reserve (WPBR) plus
- (ii) future policy related liabilities (FPRL) plus
- (iii) the realistic current liabilities of the fund

The WPBR is the main component of the product related liability, and is mainly determined using a retrospective asset share calculation.

Asset shares are calculated by rolling up the premiums paid, less expenses and charges using the actual investment returns earned on the with-profits fund. The assumptions used within the asset share calculations are consistent with those that are actually used to determine policyholders' bonuses. A number of adjustments are made to reflect future expected policyholder benefits and other outgoings. For certain classes of business including conventional with-profits whole life, industrial branch and many pension contracts (which have capped charges) a prospective bonus reserve valuation is performed instead, valuing future claims and expenses using the expected future bonus rates.

The FPRL includes a market consistent valuation of the costs of guarantees, options and smoothing. This is determined using stochastic modelling. The FPRL also includes other liabilities such as tax on shareholder transfers and enhancements to policy benefits arising from the distribution of surplus from non-profit business written within the with-profits fund or from the Company's subsidiary, Prudential Annuities Limited (PAL). For the Scottish Amicable Insurance Fund (SAIF), the FSA realistic liability calculation requires that all of the surplus within the fund is distributed to policyholders and therefore the FPRL is increased up to the point where the fund has no working capital.

The FSA realistic value of liabilities is adjusted in accordance with FRS 27 to remove the present value of shareholder transfers and related tax. Shareholder transfers are recognised as a liability for the purposes of FSA regulatory returns but, for accounting purposes under FRS 27, shareholders' transfers are recognised only on declaration, consistent with the current basis of financial reporting.

The reported assets include the Company's interest in its subsidiary, PAL, adjusted from the value reported in the FSA realistic balance to reflect differences in the provisioning and capital requirements between the accounting and FSA realistic basis.

Under FSA reporting, the assets include the present value of future profits of PAL and of non-profit business written within the with-profit funds. Under FRS 27 these items are not recognised. Similarly, that part of these future profits which is included in the FSA FPRL is excluded under FRS 27.

D. General Business

General insurance business is accounted for on an annual accounting basis.

Premiums are accounted for when risks are assumed. Premiums are shown gross of commission and exclude any taxes or duties based on premiums. In determining the result, the proportion of premiums written relating to periods of risk beyond the year end is carried forward to subsequent accounting periods as unearned premiums, calculated on a daily basis, so that earned premiums relate to risks carried during the accounting period. A similar treatment is applied to acquisition expenses.

THE PRUDENTIAL ASSURANCE COMPANY LIMITED

Accounting Policies (continued)

Claims incurred comprise the settlement and handling costs of paid and outstanding claims arising from events occurring in the year and adjustments to prior years' claims provisions. Outstanding claims comprise claims incurred up to but not paid at the end of the accounting period whether reported or not.

An unexpired risks provision is established for any excess of expected claims and deferred acquisition costs over unearned premiums and investment return. The assessment of expected claims has regard to claims experience up to the end of the accounting period. No specific provision is made for major events occurring after this date.

An equalisation provision has been established in accordance with the requirements of the Prudential Sourcebook for Insurers in order to reduce the impact of claims volatility.

Transactions in respect of general business operations in run-off are accounted for within the general business technical account.

E. Investments

Investment income and realised and unrealised gains in respect of long-term business are included in the long-term business technical account. Other investment income and realised gains and, except in respect of shareholder investments in subsidiaries, unrealised gains are included in the non-technical account.

Realised gains are determined as the difference between net proceeds on disposal and the purchase price. Movements in unrealised gains comprise the change in the value of investments held at the balance sheet date and the reversal of unrealised investment gains and losses recognised in earlier accounting periods in respect of investment disposals.

Shareholder investments in entities that undertake long-term business are shown at current values using embedded values as determined in accordance with the European Embedded Value principles issued by the CFO Forum of European Insurance Companies in May 2004 and expanded by the Additional Guidance on European Embedded Value Disclosures issued in October 2005. Investments in other subsidiaries are valued at net asset value. The movement in values is taken to the revaluation reserve, other than a permanent diminution in value, which is taken to the non-technical account. Investments in participating interests are carried at fair value.

Under FRS 26, upon initial recognition financial investments are recognised at fair value. Subsequently, the Company is permitted, subject to specific criteria, to designate its investments as either financial investments at fair value through profit and loss, financial investments held on an available-for-sale basis, financial investments held to maturity, or loans and receivables. The Company holds financial investments on the following bases:

- (i) Financial investments at fair value through profit and loss – this comprises assets designated by management as fair value through profit and loss on inception. These investments (and including all derivatives) are valued at fair value with all changes thereon being recognised in the profit and loss account.
- (ii) The Company uses bid prices to value its quoted financial investments. Actively traded investments without quoted prices are valued using external broker bid prices. If there is no active established market for an investment, the Company applies an appropriate valuation technique such as discounted cash flow technique. Further information on valuation techniques is provided in Note 32 (A) on page 52.
- (iii) Loans and receivables – these comprise investments that have fixed or determinable payments and are not designated as fair value through profit and loss or available-for-sale. These investments include loans secured by mortgages, deposits and loans to policyholders and other unsecured loans and receivables. These investments are carried at amortised cost using the effective interest method and subject to impairment reviews. The Company measures the amount of the impairment loss by comparing the amortised cost with the present value of its estimated future cash flows discounted at the original effective interest rate.

Properties are valued annually by professional external valuers at market value as defined in the Appraisal and Valuation Manual issued by the Royal Institute of Chartered Surveyors in particular Practice statement 3.2. In accordance with SSAP 19, no depreciation is provided on investment properties as the directors consider that to depreciate them would not give a true and fair view.

THE PRUDENTIAL ASSURANCE COMPANY LIMITED

Accounting Policies (continued)

In accordance with the Companies Act 1985 Schedule 9A paragraph 65d, there is a requirement to show the net book value on a historical cost basis of properties in a note to the accounts. For this purpose properties are depreciated over forty years. Leasehold properties are depreciated over forty years, or if the lease is less than forty years, over the length of the lease.

F. Tax

Tax is charged on all taxable profits arising in the accounting period. The UKGAAP rules for taxing long-term business are significantly different to those applying to non-insurance companies and the different classes of business written by the Company are themselves subject to distinct rules. Furthermore the tax calculations are performed using data from the regulatory returns submitted to the FSA rather than the accounts results. There may be significant and complex differences between the regulatory and accounting bases.

Except where otherwise required by accounting standards, full provision for deferred tax without discounting is made for all timing differences which have arisen but not reversed at the balance sheet date.

G. Foreign Currencies

Foreign currency revenue transactions are translated at average exchange rates for the year. Monetary foreign currency assets and liabilities are translated at year end exchange rates. Exchange differences on long-term business and on net investments in foreign enterprises less matching borrowings are taken to reserves. Other exchange differences are included in the profit and loss account.

H. Tangible Assets

Tangible assets, principally fixtures and fittings, building improvements, computer equipment and software development expenditure, are capitalised and depreciated by equal annual instalments over their estimated useful lives. Fixtures and fittings and building improvements are depreciated over ten years, computer hardware over five years and software over three years.

I. Pension Costs

The Company applies the requirements of FRS 17 'Retirement Benefits' as amended December 2006. The Prudential Group operates a number of defined contribution and defined benefit pension schemes and a portion of these defined benefit pension schemes' surplus or deficits is attributed to the Company. Further details are disclosed in note 10. Contributions in respect of defined contribution schemes are recognised when incurred.

The assets and liabilities of the defined benefit pension schemes of the Prudential Group are subject to a full triennial actuarial valuation using the projected unit method. Estimated future cash flows are discounted at a high quality corporate bond rate, adjusted to allow for the difference in duration between the bond index and the pension liabilities where appropriate, to determine its present value. PSPS is the largest defined benefit scheme and accounts for 87% of the underlying scheme liabilities of the Prudential Group's defined benefit schemes under FRS 17. The difference between the fair value of the scheme assets and the actuarial value of the scheme liabilities is a surplus or deficit on the scheme. The Company's share of pension surplus is recognised to the extent that the Company is able to recover a surplus either through reduced contributions in the future or through refunds from the scheme.

The aggregate of the actuarially determined service cost of the currently employed personnel, the unwind of discount on liabilities at the start of the period, gains and losses on settlements and curtailments, less the expected investment return on the scheme assets at the start of the reporting period are recognised in the profit and loss account. To the extent that part or all of the Company's interest in the pension surplus is not recognised as an asset, the unrecognised surplus is initially applied to extinguish any past service costs, losses on settlements or curtailments that would otherwise be included in the profit and loss account. Next, the expected investment return on the scheme assets is restricted so that it does not exceed the total of the current service cost, interest cost and any increase in the recoverable surplus. Any further adjustment for the unrecognised surplus is treated as an actuarial gain or loss.

The actuarial gains and losses which arise from assumptions, the difference between actual and expected investment return on the scheme assets, and experience gains and losses on liabilities are recognised in the statement of total recognised gains and losses in respect of the portion attributed to

THE PRUDENTIAL ASSURANCE COMPANY LIMITED

Accounting Policies (continued)

the Company's shareholder's funds, and the long-term technical account, in respect of the portion attributable to the Company's with-profits fund. Actuarial gains and losses also include adjustment for unrecognised pension surplus as described above.

J. Intangible Assets

Intangible assets include a licence, which represents the value of an agreement with a fellow subsidiary company for the use of certain Scottish Amicable assets, which is being amortised over a period of 20 years to 30 September 2017, on a basis consistent with the revenue stream from the agreement.

Intangible assets also include distribution rights which relate to facilitation fees paid in relation to the bancassurance partnership arrangements in Asia for the bank distribution of insurance products for a fixed period of time. The distribution rights amounts are amortised over the term of the distribution contracts.

THE PRUDENTIAL ASSURANCE COMPANY LIMITED

Notes on the financial statements

1. Segmental analysis

(a) Long-term business

Premiums and profit	Gross premiums written		Balance on the technical account before tax	
	2008 £m	2007 £m	2008 £m	2007 £m
United Kingdom	7,371	6,032	512	292
Hong Kong	1,154	1,003	(2)	37
France	278	308	-	1
	<u>8,803</u>	<u>7,343</u>	<u>510</u>	<u>330</u>

New business

	Regular premiums		Single premiums	
	2008 £m	2007 £m	2008 £m	2007 £m
United Kingdom	236	222	6,046	5,081

THE PRUDENTIAL ASSURANCE COMPANY LIMITED

Notes on the financial statements (continued)

c) Balance Sheet

	Attributable to Long-term funds		Attributable to Shareholders' funds	
	<u>2008 £m</u>	<u>2007 £m</u>	<u>2008 £m</u>	<u>2007 £m</u>
Provision for Deferred Tax				
Accelerated capital allowances	(7)	1	2	-
Policy reserves	133	56	-	-
Short term timing differences	(159)	(52)	(6)	(6)
Unrealised gains	471	1,866	-	-
Deferred acquisition costs	(84)	(111)	-	-
Undiscounted provision for deferred tax liability/(deferred tax asset)	<u>354</u>	<u>1,760</u>	<u>(4)</u>	<u>(6)</u>
Deferred tax liability/(deferred tax asset) at start of the period	1,760	2,027	(6)	(8)
Deferred tax (credited) charged in technical/non-technical account for the period	<u>(1,406)</u>	<u>(267)</u>	<u>2</u>	<u>2</u>
Deferred tax liability/(deferred tax asset) at end of the period	<u>354</u>	<u>1,760</u>	<u>(4)</u>	<u>(6)</u>

The deferred tax liability relating to the pension asset attributable to the Company of £4m (2007: £27m) has been netted off against the pension asset on the balance sheet. The movement in this deferred tax liability has been included in the tax (credit) charge within the technical, non-technical account and statement of total recognised gains and losses.

7. Equalisation provision

An equalisation provision has been established in accordance with the requirements of the Prudential Sourcebook for Insurers. The provision, which is in addition to the provisions required to meet the anticipated ultimate cost of settlement of outstanding claims at the balance sheet date, is required by Schedule 9A of the Companies Act 1985 to be included within technical provisions in the balance sheet, notwithstanding that it does not represent a liability at the balance sheet date. This has had the effect of reducing shareholders' funds by £1m (2007: £1m). There has been no movement in the equalisation provision during the year (2007: Nil). However an IBNR (Incurred but not reported) provision has been maintained.

8. Operations in run-off

Operations in run-off comprise UK personal and commercial lines of general insurance business. The profit and loss account includes the following amounts in respect of these operations:

	<u>2008 £m</u>	<u>2007 £m</u>
Claims incurred, net of reinsurance		
Claims paid	(3)	(2)
Change in provision for claims	<u>(6)</u>	<u>(1)</u>
Total	<u>(9)</u>	<u>(3)</u>
Net operating expenses	(1)	(2)
Change in the equalisation provision	-	-
Technical result	<u>(10)</u>	<u>(5)</u>
Investment return	<u>10</u>	<u>5</u>
Operating profit before tax	<u>-</u>	<u>-</u>

THE PRUDENTIAL ASSURANCE COMPANY LIMITED

Notes on the financial statements (continued)

During 2005, the Company entered into a Solvent Scheme of Arrangement under Section 425 of the Companies Act 1985, in respect of certain closed Marine and London Market business. All claims lodged by creditors by the Scheme submission date have now been settled, and related claims provisions in these financial statements have been released. In accordance with the terms of the Scheme claims notified after the final claims submission date are not valid, however an IBNR reserve has been maintained to meet legal fees incurred repudiating late reported claims and to meet claims from countries outside the jurisdiction of the Scheme.

9. Acquisition and disposal of subsidiaries and participating interests

On 31 December 2008 the Company transferred Prudential (Netherlands One) Limited at cost of £5m to Prudential Group Holdings Limited.

On 31 December 2008 the Company transferred Prudential Corporation Limited at cost of £2 to Prudential Group Holdings Limited.

On 14 March 2008 St. Helen's Trust Limited was liquidated for £0.1m. There was no profit or loss in the year of liquidation following a permanent writedown of £0.4m in previous years.

On 20 September 2007 the Company transferred Prudential Assurance Company Singapore (Pte) Limited to Prudential Singapore Holdings Pte Limited for £949m. After taking into account the cost of £8m the profit on disposal was £941m.

10. Information on staff and pension costs

	<u>2008</u>	<u>2007</u>
The average number of persons employed by the Company During the year was:		
United Kingdom	29	82
Hong Kong	756	711
	<u>785</u>	<u>793</u>
The costs of employment were:	<u>2008 £m</u>	<u>2007 £m</u>
Wages and salaries	32	27
Other pension costs in respect of defined contribution schemes (see below)	2	1
	<u>34</u>	<u>28</u>

Defined Benefit Pension Schemes

With the exception of employees of consolidated venture fund investment subsidiaries, the majority of staff employed by the Prudential Group in the UK are members of the Prudential Group's pension schemes. The largest scheme is the Prudential Staff Pension Scheme (PSPS). This scheme is primarily a defined benefit scheme but no employees with employment offers after 31 July 2003 are eligible for membership of the defined benefit section of the Scheme. At 31 December 2008, on the FRS 17 'Retirement Benefits' (FRS 17) basis of valuation, the underlying PSPS liabilities account for 87% (2007: 87%) of the aggregate liabilities of the Prudential Group's defined benefit schemes. There is also a smaller defined benefit scheme, Scottish Amicable Pension Scheme (SAPS) in which the Company staff participate.

For the purposes of preparing consolidated financial statements, the Prudential Group applies IFRS basis accounting including IAS 19 'Employee Benefits' (IAS 19). However, individual company accounts of the parent, Prudential plc and the Company continue to apply UK GAAP. In 2006, the Company adopted the Amendment to FRS 17 issued in December 2006 in the Company's financial statements which aligned the FRS 17 disclosures with IAS 19.

For both schemes, the projected unit method was used for the most recent full actuarial valuations. Defined benefit schemes are generally required to be subject to full actuarial valuation every three years to assess the appropriate level of funding for schemes having regard to their commitments.

THE PRUDENTIAL ASSURANCE COMPANY LIMITED

Notes on the financial statements (continued)

These valuations include assessments of the likely rate of return on the assets held within the separate trustee administered funds. PSPS was last actuarially valued as at 5 April 2005 and this valuation demonstrated the Scheme to be 94% funded, with a shortfall of actuarially determined assets to liabilities of 6%, representing a deficit of £243m. As a result, changes were made to the basis of funding for the scheme with effect from that date. Deficit funding amounts designed to eliminate the actuarial deficit over a 10-year period have been and are being made. Total contributions to the Scheme for deficit funding and employer's contributions for ongoing service for current employees are expected to be of the order of £70-75m per annum, subject to a reassessment when the subsequent valuation is completed. In 2008 total contributions for the year including expenses and augmentation were £79m (2007: £82m). Deficit funding for PSPS is apportioned in the ratio of 70/30 between the Company's with-profits fund and Prudential plc following detailed consideration in 2005 of the sourcing of previous contributions. Employer contributions for ongoing service of current employees have been apportioned in the ratio relevant to current activity. The PSPS valuation as at 5 April 2008 is currently being finalised.

For SAPS, it is estimated that 50% of the deficit is attributable to the Company's with-profits sub-fund and the other 50% is attributable to the Company's shareholders' funds.

Corporate Governance

The rules of the defined benefit section of PSPS, a final salary scheme, specify that, in exercising its investment powers, the Trustee's objective is to achieve the best overall investment return consistent with the security of the assets of the scheme. In doing this, regard is had to the nature and duration of the scheme's liabilities. The Trustee sets the benchmark for the asset mix, following analysis of the liabilities by the Scheme's Actuary and, having taken advice from the Investment Managers, then selects benchmark indices for each asset type in order to measure investment performance against a benchmark return.

The Trustee reviews strategy, the asset mix benchmark and the Investment Managers' objectives every three years, to coincide with the Actuarial Valuation, or earlier if the Scheme Actuary recommends. Interim reviews are conducted annually based on changing economic circumstances and financial market levels.

The Trustee sets the general investment policy and specifies any restrictions on types of investment and the degrees of divergence permitted from the benchmark, but delegates the responsibility for selection and realisation of specific investments to the Investment Managers. In carrying out this responsibility, the Investment Managers are required by the Pensions Act 1995 to have regard to the need for diversification and suitability of investments. Subject to a number of restrictions contained within the relevant investment management agreements, the Investment Managers are authorised to invest in any class of investment asset. However, the Investment Managers will not invest in any new class of investment asset without prior consultation with the Trustee.

The Trustee consults the Principal Employer, the Company, on these investment principles, but the ultimate responsibility for the investment of the assets of the scheme lies with the Trustee.

The investment policies and strategies for the other defined benefit scheme, SAPS, which is a final salary scheme, follow similar principles, but have different target allocations, reflecting the particular requirements of the schemes.

THE PRUDENTIAL ASSURANCE COMPANY LIMITED

Notes on the financial statements (continued)

The key assumptions adopted for the FRS 17 valuations in PSPS and SAPS were:

	2008	2007
	%	%
Price inflation	3.0	3.3
Rate of increase in salaries	5.0	5.3
Rate of increase of pensions in payments:		
PSPS		
Guaranteed - LPI (Max 5%)	3.3	3.3
Guaranteed - LPI (Max 2.5%)	2.5	2.5
Discretionary	2.5	2.5
SAPS	3.0	3.3
Rate used to discount scheme liabilities	6.1	5.9

Long-term expected rates of return	Prospectively for 2009	2008	2007
	%	%	%
Equities	6.80	7.50	7.50
Bonds	4.80	5.40	4.90
Properties	6.05	6.75	6.80
Other assets	2.00	5.50	5.00
Weighted average long-term expected rate of return	4.50	6.10	5.90

The long-term expected rates of return have been determined after applying due consideration to the requirements of paragraph 54 of FRS 17, in particular, taking account of the values of the assets.

The calculations are based on current actuarially calculated mortality estimates with a specific allowance made for future improvements in mortality, which is broadly in line with that adopted for the 92 series of mortality tables prepared by the Continuous Mortality Investigation Bureau of the Institute and Faculty of Actuaries. In 2007 the mortality assumptions were strengthened by including a floor to the medium cohort improvements.

The tables used for PSPS at 31 December 2008 and 2007 were:

Male: 100 per cent PMA92 with CMIR17 improvements to the valuation date and medium cohort improvements subject to a floor of 1.75% up to the age of 90, decreasing linearly to zero by the age of 120.

Female: 100 per cent PFA92 with CMIR17 improvements to the valuation date and 75% medium cohort improvements subject to a floor of 1.0% up to the age of 90, decreasing linearly to zero by the age of 120.

The assumed life expectancies on retirement at age 60, based on the mortality table used was:

	2008		2007	
	Male	Female	Male	Female
Retiring today	26.4	28.4	26.2	28.3
Retiring in 15 years time	28.9	29.8	28.7	29.3

The mean term of the current PSPS liabilities is around 18 years .

Using external actuarial advice provided by the professionally qualified actuaries, Watson Wyatt Partners, for the valuation of PSPS and Hazell Carr for SAPS, the most recent full valuations have been updated to 31 December 2008 applying the principles prescribed by FRS 17.

THE PRUDENTIAL ASSURANCE COMPANY LIMITED

Notes on the financial statements (continued)

The assets and liabilities of PSPS and SAPS were:

	31 Dec 08		31 Dec 07		31 Dec 06	
	£m	%	£m	%	£m	%
Equities	978	19	1,472	28	1,553	30
Bonds	2,619	51	1,299	25	2,187	43
Properties	290	6	583	11	621	12
Other assets	1,270	24	1,935	36	753	15
Total value of assets	5,157	100	5,289	100	5,114	100

Present value of underlying scheme liabilities	4,473	4,815	5,014
Underlying surplus (deficit) in the schemes	684	474	100

Of which the following amounts have been attributed to the Company:

Attributable to the Company's with-profits fund	98	338	73
Attributable to the Company's shareholders' funds	(22)	(27)	(21)
	<u>76</u>	<u>311</u>	<u>52</u>

After deducting deferred tax, the amounts reflected in the balance sheet of the Company are:

	2008 £m	2007 £m	2006 £m
With-profits fund	88	304	66
Shareholders' funds	(16)	(20)	(15)
	<u>72</u>	<u>284</u>	<u>51</u>

The surplus in the Prudential Staff Pension Scheme recognised in the balance sheet of the Company represents the element of the amount which is recoverable through reduced future contributions that is attributable to the Company and is net of the apportionment to Prudential plc.

Underlying scheme assets and liabilities of PSPS and SAPS

The change in the present value of scheme liabilities and the change in the fair value of the scheme assets of PSPS and SAPS are as follows:

	2008 £m	2007 £m
Present value of scheme liabilities at beginning of year	4,815	5,014
Service costs – current	38	52
Interest cost	277	255
Curtailment credit	(44)	-
Employee contributions	1	2
Actuarial gains	(398)	(293)
Benefit payments	(216)	(215)
Present value of scheme liabilities at end of year	4,473	4,815

	2008 £m	2007 £m
Fair value of scheme assets at beginning of year	5,289	5,114
Expected return on scheme assets	324	299
Employee contributions	1	2
Employer contributions*	85	92
Actuarial (losses) gains	(326)	(3)
Benefit payments	(216)	(215)
Fair value of scheme assets at end of year	5,157	5,289

* The contributions include deficit funding and ongoing contributions.

THE PRUDENTIAL ASSURANCE COMPANY LIMITED

Notes on the financial statements (continued)

Pension credit (charge) and actuarial gains (losses) of PSPS and SAPS

	2008 £m	2007 £m
Pension credit (charge)		
Operating charge – current service cost	(38)	(52)
Curtailment credit	44	-
Finance income (expense):		
Interest on pension scheme liabilities	(277)	(255)
Expected return on pension scheme assets**	324	299
	47	44
Total pension credit (charge) of the schemes	53	(8)
Of which the following amounts have been attributed to the Company:		
With-profits fund	0	10
Shareholders' funds	0	(6)
	0	4

The pension credit (charge) relating to PSPS attributable to the Company corresponds to the surplus recognised on the balance sheet of the Company. In 2008, an amount of £48m was applied from the unrecognised portion of the PSPS surplus as at 31 December 2008 to extinguish the pension credit attributable to the Company.

Actuarial gains (losses)	2008 £m	2007 £m	2006 £m	2005 £m	2004 £m
Actual less expected return on scheme assets * (6%), 0%, 3%, 11%, 3% of pension scheme assets)	(325)	(3)	150	533	112
Experience gains (losses) on scheme liabilities (3%, 0%, 0% 0%, 0% of the present value of scheme liabilities)**	148	(14)	18	(1)	(21)
Changes in assumptions underlying the present value of scheme liabilities	250	307	254	(453)	(136)
Total actuarial gains (losses) of the schemes (2%, 6%, 8%, 2%, (1%) of the present value of the scheme liabilities)	73	290	422	79	(45)
Of which the following amounts have been attributed to the Company:					
With-profits fund	(287)	205	288	118	(37)
Shareholders' funds	2	(6)	16	(8)	2
	(285)	199	304	110	(35)

* The total actual return on scheme assets for both PSPS and SAPS is a net loss of £2m (2007: net gain £296m) of which a net gain of £6m (2007: net gain £200m) relates to the amounts attributable to the Company's with-profits funds.

** The experience gains on scheme liabilities in 2008 of a gain of £148m relate mainly to the 'true-up' reflecting improvements in data consequent upon the ongoing triennial valuation of PSPS.

The actuarial gains (losses) relating to PSPS attributable to the Company's with-profits fund corresponds to the surplus (deficit) recognised on the balance sheet of the Company. In 2008, the actuarial gains (losses) attributable to the Company's with-profits fund included a loss of £337m for the unrecognised portion of the PSPS surplus which has not been applied against the pension credit (charge). Since the shareholders' profit in respect of the Company's with-profits fund is a function of the actuarially determined surplus for distribution, the overall profit and loss account result is not directly affected by the level of pension cost or other expenses relating to the with-profits fund. The amounts of pension credit of £nil (2007: credit of £10m) and actuarial losses of £ 287m (2007: actuarial gains of £205m) attributable to the Company's with-profits fund are included in the technical account and reflected in the transfer to or from the fund for future appropriations.

THE PRUDENTIAL ASSURANCE COMPANY LIMITED

Notes on the financial statements (continued)

The 2005 actuarial gains attributable to the Company's with-profits fund included an additional gain of £59m in 2005 reflecting the changed estimate of allocation in the deficit of PSPS from a ratio of 80/20 between the Company's with-profits fund and Prudential plc prior to 2005 to a ratio of 70/30 from 2005 onwards.

The pension charge of £nil (2007: £6m) attributable to the Company's shareholders' funds are included in the non-technical account. The actuarial gains before tax attributable to the Company's shareholders' funds of £2m (2007: actuarial losses of £6m) are recorded in the statement of total recognised gains and losses. Cumulative actuarial gains shown in the statement of total recognised gains and losses as at 31 December 2008 for the Company amounted to £2m (2007: cumulative actuarial gains of £4m).

The table below shows the sensitivity of the underlying PSPS liabilities at 31 December 2008 of £4,075m (2007: £4,361m) and £398m (2007: £454m) to changes in discount rates and inflation rates.

Assumption	Change in assumption	Impact on PSPS and SAPS scheme liabilities on FRS17 basis
2008		
Discount rate	Decrease by 0.2% from 6.1% to 5.9%	Increase scheme liabilities by: PSPS 3.3% SAPS 4.9%
Discount rate	Increase by 0.2% from 6.1% to 6.3%	Decrease scheme liabilities by: PSPS 3.1% SAPS 4.6%
Rate of inflation	Decrease by 0.2% from 3.0% to 2.8% with consequent reduction in salary increases	Decrease scheme liabilities by: PSPS 0.8% SAPS 4.5%
2007		
Discount rate	Decrease by 0.2% from 5.9% to 5.7%	Increase scheme liabilities by: PSPS 3.5% SAPS 5.3%
Discount rate	Increase by 0.2% from 5.9% to 6.1%	Decrease scheme liabilities by: PSPS 3.4% SAPS 5.1%
Rate of inflation	Decrease by 0.2% from 3.3% to 3.1% with consequent reduction in salary increases	Decrease scheme liabilities by: PSPS 1.3% SAPS 5.0%

Total employer contributions expected to be paid into PSPS and SAPS for the year ending 31 December 2008 amounts to £89m, subject to a reassessment when the valuation as at 5 April 2008 is completed.

Defined Contribution Pension Schemes

The Company operates defined contribution schemes in Hong Kong. The cost of these contributions was £1.2m (2007: £1.0m). £1.1m was outstanding at 31 December 2008 (2007: £0.2m).

Notes on the financial statements (continued)

Share-based payments

The Company participates in a number of share award and share option plans relating to Prudential plc shares, which are described below.

The Group Performance Share Plan (GPSP) is the incentive plan in which all executive directors and other senior executives within the Prudential Group, of which the Company is a part, can participate. This scheme was established as a replacement for the Restricted Share Plan (RSP) under which no further awards could be made after March 2006. Awards are granted either in the form of a nil cost option, conditional right over shares, or such other form that shall confer to the participant an equivalent economic benefit, with a vesting period of three years. The performance measure for the awards is that Prudential's Total Shareholder Return (TSR) outperforms an index comprising of peer companies. Vesting of the awards between each performance point is on a straight-line sliding scale basis. Participants are entitled to the value of reinvested dividends that would have accrued on the shares that vest. Shares are currently purchased in the open market by a trust for the benefit of qualifying employees.

The RSP was, until March 2006, the long-term incentive plan for executive directors and other senior executives designed to provide rewards linked to shareholder return. Each year participants were granted a conditional option to receive a number of shares. There was a deferment period of three years at the end of which the award vested to an extent that depended on the performance of the Group's shares including notional reinvested dividends and on the Group's underlying financial performance. After vesting, the option may be exercised at zero cost at any time, subject to closed period rules, in the balance of a 10-year period. Shares are purchased in the open market by a trust for the benefit of qualifying employees. The RSP replaced the Executive Share Option Scheme in 1995 and all options under this plan had been exercised at 31 December 2005.

No rights were granted in the RSP if the Company's TSR performance as ranked against the comparator group is below 50th percentile. An option of 25 per cent of the maximum award is made. The maximum grant is made only if the TSR ranking of the Company is 20th percentile or above. Between these points, the size of the grant of option made is calculated on a straight-line sliding scale.

The BUPP is an incentive plan created to provide a common framework under which awards would be made to senior employees. Awards under this plan in 2007 and 2008 were based on growth in Shareholder Capital Value on the European Embedded Value (EEV) basis with performance measured over three years. Upon vesting, half of the vested award is released as shares and the other half released in cash. Participants are entitled to receive the value of reinvested dividends over the performance period for those shares that vest. The growth parameters for the awards are relevant to each region and vesting of the awards between each performance point is on a straight-line sliding scale basis.

UK-based executive directors are eligible to participate in the Prudential HM Revenue and Customs (HMRC) approved UK Savings Related Share Option Scheme (SAYE scheme) and the Asia-based executive director can participate in the equivalent International SAYE scheme. The schemes allow employees to save towards the exercise of options over Prudential plc shares, at an option price set at the beginning of the savings period at a discount of up to 20 per cent to the market price. Savings contracts may be up to £250 per month for three or five years, or additionally in the UK scheme seven years. On maturity at the end of the set term, participants may exercise their options within six months of the end of the savings period and purchase Prudential plc shares. If an option is not exercised within six months, participants are entitled to a refund of their cash contributions plus interest if applicable under the rules. Shares are issued to satisfy options that are exercised. No options may be granted under the schemes if the grant would cause the number of shares which have been issued, or which remain issuable pursuant to options granted in the preceding 10 years under the scheme and other share option schemes operated by the Company, or which have been issued under any other share incentive scheme of the Company, to exceed 10 per cent of the Company's ordinary share capital at the proposed date of grant.

THE PRUDENTIAL ASSURANCE COMPANY LIMITED

Notes on the financial statements (continued)

UK-based executive directors are also eligible to participate in the Company's HMRC approved Share Incentive Plan (SIP) which allows all UK-based employees to purchase shares of Prudential plc (partnership shares) on a monthly basis out of gross salary. For every four partnership shares bought, an additional matching share is awarded, purchased on the open market. Dividend shares accumulate while the employee participates in the plan. Partnership shares may be withdrawn from the scheme at any time. If the employee withdraws from the plan within five years the matching shares are forfeit and if within three years, dividend shares are forfeit.

The 1,000 Day LTIP plan was a Prudential Group, UK insurance operations performance-based plan in which the UK Remuneration Committee could, at any time up to 5 October 2005, select employees of the Company at its absolute discretion, for participation in the plan. The performance period was 1,000 days and, based on the final performance level being at, or above, the threshold level, the committee shall grant participants 10 per cent of the allocated award in 2005, 20 per cent in 2006 and the remaining 70 per cent in 2007. There are no beneficial interests, or any rights to dividends until such time as the awards are released, at nil cost, to participants. There are no outstanding shares awarded through this scheme.

The new Prudential Group's Prudential Corporation Asia Long-Term Incentive Plan (PCA LTIP) is an incentive plan for senior employees and chief executive officers replacing the Asia Business Unit Performance Plan (BUPP). The Company has a branch in Hong Kong and is therefore eligible to participate. Awards under the new scheme will vest after three years subject to the employee being in employment at the time of vesting without any performance conditions. Awards which are Prudential plc shares will be discretionary and on year by year basis determined by the Group's full year financial results and the employee's contribution to the business.

The other arrangements relate to various awards that have been made without performance conditions to individual employees, typically to ensure their appointment or retention.

Movements in share options outstanding under the Company's share-based compensation plans relating to Prudential plc shares during 2008 and 2007 were as follows:

	2008		2007	
	Number of options	Weighted average exercise price £	Number of options	Weighted average exercise price £
Options outstanding (including conditional options)				
Beginning of year:	518,096	1.98	357,106	3.10
Granted	171,562	4.44	539,813	0.90
Exercised	(57,851)	3.31	(49,675)	3.33
Forfeited	(27,622)	3.92	(219,607)	0.42
Expired	(98,244)	5.18	(109,541)	2.22
End of year	505,941	1.87	518,096	1.98
Options immediately exercisable, end of year	9,547	4.07	10,065	3.43

The weighted average share price of Prudential plc for the year ended 31 December 2008 was £5.46 compared to £7.15 for the year ended 31 December 2007.

Movements in share awards outstanding under the Group's share-based compensation plans relating to Prudential plc shares at 31 December 2008 and 2007 were as follows:

	2008	2007
	Number of awards	Number of awards
Awards outstanding		
Beginning of year:	164,987	124,017
Granted	111,003	196,362
Exercised	(53,233)	(62,258)
Forfeited	(10,427)	(93,134)
Expired	(1,021)	-
End of year	211,309	164,987

The following table provides a summary of the range of exercise prices for Prudential plc options (including conditional options) outstanding at 31 December 2008.

THE PRUDENTIAL ASSURANCE COMPANY LIMITED

Notes on the financial statements (continued)

	Number outstanding	Outstanding Weighted average remaining contractual life (years)	Weighted average exercise prices £	Exercisable Number exercisable	Weighted average exercise prices £
Range of exercise prices					
Between £0 and £1	304,870	7.80	0.0	-	-
Between £1 and £2	-	-	-	-	-
Between £2 and £3	-	-	-	-	-
Between £3 and £4	-	-	-	-	-
Between £4 and £5	152,134	2.96	4.43	9,547	4.07
Between £5 and £6	48,937	2.29	5.56	-	-
Between £6 and £7	-	-	-	-	-
	505,941	5.81	1.87	9,547	4.07

The following table provides a summary of the range of exercise prices for Prudential plc options (including conditional options) outstanding at 31 December 2007.

	Number outstanding	Outstanding Weighted average remaining contractual life (years)	Weighted average exercise prices £	Exercisable Number exercisable	Weighted average exercise prices £
Range of exercise prices					
Between £0 and £1	305,195	8.75	0.00	-	-
Between £1 and £2	-	-	-	-	-
Between £2 and £3	9,597	0.92	2.66	-	-
Between £3 and £4	28,515	1.36	3.63	10,065	3.43
Between £4 and £5	81,258	2.23	4.57	-	-
Between £5 and £6	93,294	3.08	5.60	-	-
Between £6 and £7	237	1.42	6.17	-	-
	518,096	6.15	1.98	10,065	3.43

The years shown above for weighted average remaining contractual life include the time period from end of vesting period to expiration of contract.

The weighted average fair values of Prudential plc options and awards granted during the period are as follows:

2008			2007		
Weighted average fair value			Weighted average fair value		
GPSP	Other options	Awards	GPSP	Other options	Awards
£	£	£	£	£	£
2.67	2.09	3.86	4.69	2.47	7.48

The fair value amounts relating to all options including conditional nil cost options were determined using the Black-Scholes and the Monte Carlo option-pricing models using the following assumptions:

	2008		2007	
	GPSP	Other options	GPSP	Other options
Dividend yield (%)	3.60	3.60	2.32	2.32
Expected volatility (%)	30.65	35.64	26.64	25.88
Risk-free interest rate (%)	4.18	4.43	5.67	5.22
Expected option life (years)	3.00	3.22	3.00	3.15
Weighted average exercise price (£)	-	4.67	-	5.60
Weighted average share price (£)	4.17	6.09	7.64	7.47

THE PRUDENTIAL ASSURANCE COMPANY LIMITED

Notes on the financial statements (continued)

Compensation costs for all share-based compensation plans are determined using the Black-Scholes model and the Monte Carlo model. Share options and awards granted by the parent company are valued using the share price at the date of grant. Share options and awards granted by the Company are valued using the share price at the balance sheet date. The compensation costs for all awards and options are recognised in net income over the plans' respective vesting periods. The Black-Scholes model is used to value all options other than GPSP. For the GPSP the Monte Carlo model is used to allow for the performance conditions. The models are used to calculate fair values at the grant date or balance sheet date, as appropriate, based on the quoted market price of the stock at the measurement date, the amount, if any that the employees are required to pay, the dividend yield, expected volatility, risk-free interest rates and exercise prices.

The expected volatility is measured as the standard deviation of expected share price returns based on statistical analysis of daily share prices over a period up to the grant date equal to the expected life of options. Risk free interest rates are UK gilt rates with projections for three, five and seven year terms to match corresponding vesting periods. Dividend yield is determined as the average yield over the year of the grant and expected dividends are not incorporated into the measurement of fair value.

When options are granted or awards made to employees, an estimate is made of what percentage is more than likely to vest, be forfeited, lapse or cancelled based on historical information. Based on these estimates, compensation expense to be accrued at that date is calculated and amortised over the vesting period. For early exercises of options or release of awards due to redundancy, death or resignation, the compensation expense is immediately recognised and for forfeitures due to employees leaving the Group, any previously recognised expense is reversed. However, if an employee loses their award because of the Group's failure to meet the performance criteria, previously recognised expense is not reversed.

11. Directors' emoluments

	2008	2007
	£	£
Aggregate emoluments	2,628,050	3,270,820
Aggregate amounts receivable (excluding shares) under long term incentive schemes	1,959,779	492,083
Excess retirement benefits:		
Current directors	140,231	156,077
Past directors	21,660	-
	<u>4,749,720</u>	<u>3,918,980</u>
Highest Paid Director:		
Aggregate emoluments and amounts receivable (excluding shares) under long term incentive schemes	<u>1,118,198</u>	<u>1,320,483</u>

Three directors (2007: One) exercised share options during the year. Seven directors (2007: six) were entitled to shares under Prudential's main long-term incentive scheme and four directors (2007: six) were entitled to retirement funds under defined benefit schemes. The highest paid director did not exercise any share options and did not receive any shares under long-term incentive schemes. The highest paid director in 2007 did not exercise any share options and did not receive shares under long-term incentive schemes.

12. Auditors' remuneration

During the year the Company obtained the following services from KPMG Audit Plc (KPMG) at costs as detailed below:

	<u>2008 £m</u>	<u>2007 £m</u>
Audit services		
Fees payable to KPMG for the audit of the Company's accounts	1.6	1.4
Non-audit services		
Fees payable to KPMG and its associates for other services:		
Other services pursuant to legislation, including the audit of the regulatory return	<u>0.7</u>	<u>0.9</u>
	<u>2.3</u>	<u>2.3</u>

THE PRUDENTIAL ASSURANCE COMPANY LIMITED

Notes on the financial statements (continued)

13. Intangible assets

	Distribution Rights £m	Licence & Goodwill £m	Total £m
Cost:			
At 1 January 2008	-	174	174
Exchange differences	-	-	-
Additions	148	-	148
Disposals	-	-	-
At 31 December 2008	<u>148</u>	<u>174</u>	<u>322</u>
Amortisation:			
At 1 January 2008	-	51	51
Exchange differences	-	-	-
Provided in the year in the long-term business technical account	1	9	10
Disposals	-	-	-
At 31 December 2008	<u>1</u>	<u>60</u>	<u>61</u>
Net book value at 31 December 2008	<u>147</u>	<u>114</u>	<u>261</u>
Net book value at 31 December 2007	-	123	123

The charge for amortisation for the year ended 31 December 2007 was £45m with £34m charged to the non-technical account and £11m charged to the long-term business technical account. The 2007 charge to the non-technical account related to goodwill which arose on the purchase by the Company of the Scottish Amicable Life Assurance Society on 30 September 1997 and a licence in respect of the estimated net present value of income from current service agreements, both of which were fully amortised at the end of 2007 having been amortised from 1 January 1998 over a period of 10 years.

The licence primarily represents the value of an agreement with a fellow subsidiary company for the use of certain Scottish Amicable assets, which is being amortised over a period of 20 years to 30 September 2017, on a basis consistent with the revenue stream from the agreement. Under this basis, the amortisation commenced in the year 2000, when the benefits from the agreement first started to arise.

The distribution rights relate to facilitation fees paid in relation to the bancassurance partnership arrangements in Asia for the bank distribution of insurance products for a fixed period of time. The distribution rights amounts are amortised over the term of the distribution contracts.

14. Land and buildings

	<u>2008 £m</u>	<u>2007 £m</u>
Current value		
Freeholds	4,120	7,075
Leaseholds with a term of over 50 years	2,075	2,248
Leaseholds with a term of less than 50 years	322	264
	<u>6,517</u>	<u>9,587</u>
Cost	<u>5,063</u>	<u>5,342</u>

The value of land and buildings occupied by the Company amounted to £86m (2007: £124m)

If the revalued land and buildings were stated on the historical cost basis, the amounts would be:

Freehold and leasehold land and buildings

	<u>2008 £m</u>	<u>2007 £m</u>
At cost	5,063	5,342
Aggregate depreciation	(1,196)	(1,341)
Net book value based on historical cost	<u>3,867</u>	<u>4,001</u>

The charge for depreciation for the year ended 31 December 2007 was £2m.

21. Assets attributable to the long-term business fund

Of the total amount of assets shown in the balance sheet on page 16, £107,273m (2007: £124,861m) is attributable to the long-term business fund.

22. Share capital

The Company's authorised share capital is £1,787,500,000 comprising 1,550,000,000 ordinary shares of 25p each, of which 970,468,254 shares have been issued fully paid; 1,000,000,000 A Preference Shares of £1 each, of which 1,000,000 shares have been issued fully paid; and 1,600,000,000 B Preference Shares of 25p, of which 347,600,000 have been issued fully paid. No changes in the share capital of the Company took place during the year.

The A Preference Shares issued shall be redeemed by the Company without notice on 8 May 2016. The premium payable on redemption amounts to 28.08p, which is increased by the percentage of the RPI from a date 30 days prior to the first issue of any preference shares to a date 30 days prior to redemption. The A Preference Shares carry the right to receive an index linked cumulative preferential dividend, payable annually. The A Preference Shares carry no voting rights except if a resolution is proposed abrogating, varying or modifying any of the rights or privileges of the holders of the A Preference Shares, but carry preferential rights in priority to other shareholders to payment on a return of capital in the event of the winding up of the Company. The B Preference Shares issued carry the right to receive a non-cumulative preferential dividend which shall accrue at the rate of two pence per annum. The B Preference Shares may not be redeemed otherwise than at the option of the Company at any time after the fifth anniversary of the date of issue of such B Preference Share. The B Preference Shares carry no voting rights except if a resolution is proposed in relation to (i) the winding up of the Company, a voluntary arrangement with creditors of the Company or proposed receivership, administrative receivership or administration of the Company; or (ii) an alteration of the rights of the B Preference Shares or in relation to any other matter which will have detrimental effect upon the rights of the B Preference Shares.

THE PRUDENTIAL ASSURANCE COMPANY LIMITED

Notes on the financial statements (continued)

28. Ultimate parent company

The ultimate and immediate parent company is Prudential plc, which is the parent company that prepares group accounts. Copies of these accounts can be obtained from the Company Secretary, Laurence Pountney Hill, London EC4R 0HH.

29. Related party transactions

The Company has taken advantage of the exemption under paragraph 3(c) of FRS 8 'Related party disclosures' from disclosing transactions with other subsidiary undertakings of the Prudential Group.

During 2008, in respect of the Company's joint venture (Prudential Health Holdings Limited), a £7m (2007: £27m) capital injection was made and £2m (2007: £3m) was recharged by the Company for support services provided in respect of Prudential Health Limited. £12m (2007: £8m) was recharged to the Company from Prudential Health Services Limited for services provided in respect of the PruProtect product underwritten by the Company. An agreement was entered into on 3 September 2007 which allows the Company to borrow from Prudential Health Holdings Limited up to an aggregate amount of £250m. The loan amount is principally linked to the emergence of regulatory losses arising in respect of all income and costs associated with selling and underwriting the Flexible Protection Plan and PruProtect Plan. The loan is to be repaid as regulatory surpluses arise in the future. In 2008 the Company borrowed £17m (2007: £19m) under this arrangement.

30. Long-term business provision

The principal valuation methods and bases adopted for the main relevant classes of business which are not reinsured are as follows:

Business in With-Profits Sub-Fund, SAIF and Defined Charge Participating Sub-Fund

The overarching principle in assumption setting is that realistic provisions are established using best estimate assumptions, taking into account the firm's regulatory duty to treat its customers fairly.

Assumptions are required in three areas, namely:

- (i) Retrospective assumptions.
- (ii) Prospective assumptions, and
- (iii) Stochastic modelling assumptions relating to the economic asset model and management actions.

Retrospective assumptions

Retrospective assumptions are required for the accumulation of past asset shares up to the valuation date. These assumptions are determined by reference to actual past experience primarily in relation to investment returns, expenses and miscellaneous surplus. The assumptions include past expense write-offs and enhancements to asset shares, and are as used when calculating specimen asset shares for the purpose of bonus setting.

The 2008 year end Investment Return for asset shares is:

Return	With-Profits Sub Fund	High Reversionary Bonus fund	SAIF
Gross return	-19.68%	N/A	-18.42%
Net return	-15.84%	-13.27%	-14.81%

Prospective assumptions

Prospective assumptions are required for the adjustments to asset shares where a prospective calculation gives a higher result and for the stochastic modelling of the cost of guarantees, options and smoothing.

For asset share adjustments, the economic assumptions used represent our best estimate assumptions allowing for prevailing market conditions at the valuation date.

Expense assumptions have been taken as the level of expenses incurred during 2008.

THE PRUDENTIAL ASSURANCE COMPANY LIMITED

Notes on the financial statements (continued)

The mortality assumption has been set to the realistic component of the statutory basis. This means that for a given business class, the margin for adverse deviations (MAD) has been removed from the corresponding statutory assumption.

The table below shows the 2008 mortality bases:

Product	Mortality Table (M/F)	Age Rating Years	Multiplier % (M/F)
Prudence Bond	AM92 / AF92	-1/-1	100/100
PSA / PIB	AM92 / AF92	-0.5/-0.5	100 /100
Personal Pensions	AM92 / AF92	-1/-1	100/100
Ordinary Branch assurances	AM92 / AF92	-0.5/-0.5	100/100
Industrial Branch	PAC 78 WL (Internal Table)	+0/+0	70/70
With-Profit Deferred Annuities	AM92 / AF92	-1/-1	100/100
SAIF Conventional With-Profits	AM92 / AF92	+1/+1	70/70
SAIF/ex-SAL Accumulating With-Profits Life	AM92 / AF92	+1/+1	70/70

For persistency, the assumptions are based on those used for European Embedded Value calculations. The persistency assumptions used to value the cost of options and guarantees are reduced by a 10% margin to make an allowance for the impact of policyholders' group actions in extreme market scenarios.

Stochastic asset model economic calibration and management actions

The cost of options, guarantees and smoothing are assessed on a market consistent basis, so that the reserves held are equal to the theoretical cost of hedging the guarantees in the market. In the absence of a deep, liquid market these costs are assessed using a "market consistent" model, with a market consistent calibration.

In order to value the Company's guarantees and options, the stochastic asset/liability model projects the with-profits liabilities forward over the next 40 years for 5,000 separate economic scenarios.

The risk free rate was assumed to be the gilt rate plus 10 bp, to reflect the reduction in the yield available on gilts due to the higher demand from financial institutions for these securities.

Separate asset models are used for the risk free rate, UK equities, overseas equities, corporate bonds, property and real interest rates. Where appropriate securities or derivatives are traded, we have demonstrated that the model is able to closely reproduce these prices. Where this is not the case (for example for property and corporate bonds) we have applied expert judgement. We have also allowed for the correlation of investment returns between different asset classes.

The cost of guarantees, options and smoothing is very sensitive to the bonus, market value reduction and investment policies that the Company will employ under varying investment conditions. Our stochastic modelling incorporates several management actions to protect the fund in adverse investment scenarios. These management actions are consistent with the PPFM and our obligation to treat customers fairly.

Other non-linked business

Provisions are calculated by the net premium valuation method. Discount rates are derived from the returns available on appropriate investments and, for equity and property assets, are based on expected

THE PRUDENTIAL ASSURANCE COMPANY LIMITED

Notes on the financial statements (continued)

income and/or earnings with no allowance for potential future capital growth. Allowance is made as follows for the risk that some or all of the anticipated future income will not be received:

- (a) For equity and property assets the income is restricted where necessary to ensure that no individual holding had a yield in excess of the annual yield on the Merrill Lynch over 10 years corporate bond index, less a risk margin.
- (b) For fixed interest securities, aggregate bond asset yields have been adjusted to allow for potential defaults within the non-linked and index-linked asset portfolios respectively.

The following discount and mortality bases were used:

	Interest Rate %	Actuarial Mortality Table Reference*
<u>UK (excluding Scottish Amicable Insurance Fund)</u>		
Term assurances - life business	3.00	AM/AF92+1
Term assurances – pensions business	3.75	AM/AF92+1
<u>Scottish Amicable Insurance Fund</u>		
Term assurances - life business	3.00	AM/AF92+1
Term assurances – pensions business	3.75	AM/AF92+1

*For assurances, provision for AIDS is made either by increasing the underlying mortality rates or by holding an explicit additional provision. In both cases, the adjustment is one-third of the "R6A" tables.

Linked business in the Non-Profit Sub-Fund

The provision for mortality, morbidity and expenses is calculated using a discounted cashflow method on the following bases:

Discount Rate	4.00% gross
Fund Growth	5.00% gross
Mortality	AM/AF92+1 plus 1/3 AIDS "R6A" for most contracts
Administration Expenses	£17 to £212 p.a. depending on the product type
Expense Inflation	3.50% p.a.

Compared with the 2007 valuation the assumptions regarding administration expenses have been revised to allow for actual and forecast costs.

Linked business in the With-Profit Sub-Fund

The provision for mortality, morbidity and expenses is calculated using a discounted cashflow method on the following bases:

Discount Rate	4.00% gross
Fund Growth	5.00% gross
Mortality	AM/AF92 -3 years
Administration Expenses	£18 to £144 p.a. depending on the product type
Expense Inflation	3.50% p.a.

Compared with the 2007 valuation the assumptions regarding administration expenses have been revised to allow for actual and forecast costs.

THE PRUDENTIAL ASSURANCE COMPANY LIMITED

Notes on the financial statements (continued)

Other long-term business provisions

Additional provisions have been established, the most significant being for the potential costs and expenses of compensating the Company's pension policyholders under the FSA review of pension opt-outs and transfer cases, for the potential costs of compensating endowment mortgage policyholders, for the potential cost of meeting annuity rate guarantees at vesting, for Industrial Branch whole of life and endowment assurances unclaimed after maturity date or policy anniversary after age 90 and for additional expenses, not otherwise catered for in the basic net premium valuation, of running off the industrial branch business.

31. Contingencies and Related Obligations

Consistent with FRS 12 'Provisions, contingent liabilities and contingent assets', appropriate provision has been made in the financial statements where the Company has an obligation arising from the events or activities described below where a reliable estimate of the obligation can be made, but not for contingent liabilities which are discussed below.

Pension Mis-selling Review

In 1988, the UK government introduced new pensions legislation intended to encourage more individuals to make their own arrangements for their pensions. During the period from April 1988 to June 1994, many individuals were advised by insurance companies, Independent Financial Advisers and other intermediaries to not join, to transfer from or to opt out of their occupational pension schemes in favour of private pension products introduced under the UK Income and Corporation Taxes Act 1988. The UK insurance regulator (previously the Personal Investment Authority, now the Financial Services Authority, (FSA)), subsequently determined that many individuals were incorrectly advised and would have been better off not purchasing the private pension products sold to them. Industry participants are responsible for compensating the persons to whom private pensions were mis-sold. As a result, the FSA required that all UK life insurance companies review their potential cases of pension mis-selling and pay compensation to policyholders where necessary and, as a consequence, record a provision for the estimated costs. The Company met the requirement of the FSA to issue offers to all cases by 30 June 2002.

Provisions in respect of the costs associated with the review have been included in the change in long-term technical provisions in the Company's profit and loss account and the transfer to or from the fund for future appropriations has been determined accordingly. The table below summarises the change in the pension mis-selling provision for the year ended 31 December 2008.

	Year ended 31 December 2008 £m	Year ended 31 December 2007 £m
Balance at start of the period	448	401
Changes to actuarial assumptions and method of calculation	(75)	71
Discount unwind	20	22
Redress to policyholders	(46)	(41)
Payment of administrative costs	(2)	(5)
Balance at end of the period	<u>345</u>	<u>448</u>

The Financial Ombudsman Service periodically updates the actuarial assumptions to be used in calculating the provision, including interest rates and mortality assumptions. The pension mis-selling provision represents the discounted value of future expected payments, including benefit payments and all internal and external legal and administrative costs of adjudicating, processing and settling those claims. To the extent that amounts have not been paid, the provision increases each year reflecting the shorter period of discount.

The directors believe that, based on current information, the provision, together with future investment return on the assets backing the provision, will be adequate to cover the costs of pension mis-selling.

THE PRUDENTIAL ASSURANCE COMPANY LIMITED

Notes on the financial statements (continued)

Such provision represents the best estimate of probable costs and expenses. However, there can be no assurance that the current provision level will not need to be increased.

The costs associated with the pension mis-selling review have been met from the inherited estate. Accordingly, these costs have not been charged to the asset shares used in the determination of policyholder bonus rates. Hence policyholders' pay-out values have been unaffected by pension mis-selling.

In 1998, Prudential stated that deducting mis-selling costs from the inherited estate would not impact its bonus or investment policy and it gave an assurance that if this unlikely event were to occur, it would make available support to the fund from shareholder resources for as long as the situation continued, so as to ensure that policyholders were not disadvantaged. The assurance was designed to protect both existing policyholders at the date it was announced, and policyholders who subsequently purchased policies while the pension mis-selling review was continuing.

This review was completed on 30 June 2002. The assurance will continue to apply to any policy in force at 31 December 2003, both for premiums paid before 1 January 2004, and for subsequent regular premiums (including future fixed, retail price index or salary related increases and Department of Work and Pensions rebate business). The assurance has not applied to new business since 1 January 2004. New business in this context consists of new policies, new members to existing pension schemes plus regular and single premium top-ups, transfers and switches to existing arrangements. The maximum amount of capital support available under the terms of the assurance will reduce over time as claims are paid on the policies covered by it.

The bonus and investment policy for each type of with-profits policy is the same irrespective of whether or not the assurance applies. Hence removal of the assurance for new business has had no impact on policyholder returns and this is expected to continue for the foreseeable future.

In February 2009, the FSA issued a revised consultation paper 09/09 proposing that future payments of compensation and redress for events occurring after 31 July 2009 may only be paid from assets attributable to shareholders.

Mortgage Endowment Products Review

In common with several other UK insurance companies, the Company used to sell low-cost endowment products related to repayment of residential mortgages. At sale, the initial sum assured is set at a level such that the projected benefits, including an estimate of the annual bonus receivable over the life of the policy, will equal or exceed the mortgage debt. The FSA is concerned that the maturity value of some of these products will be less than the mortgage debt because of a decrease in expected future investment returns since these products were sold. The FSA has worked with insurance companies to devise a programme whereby the companies write to customers indicating whether they may have a possible shortfall and outline the actions that the customers can take to prevent this possibility.

The Company is exposed to mortgage endowment products in respect of policies issued by Scottish Amicable Life plc (SAL) and policies issued by Scottish Amicable Life Assurance Society (SALAS) and transferred into the Scottish Amicable Insurance Fund (SAIF). Provisions of £5m in the non-profit sub-fund and £40m in SAIF were held at 31 December 2008 to cover potential compensation in respect of mortgage endowment product mis-selling claims. As SAIF is a separate sub-fund of the Company's long-term business fund, this provision has no impact on shareholders.

In addition, the Company's main with-profits fund paid compensation of £1m in respect of mortgage endowment products mis-selling claims in the year ended 31 December 2008 and held a provision of £54m at 31 December 2008, in respect of further compensation. This provision has no impact on the Company's profit before tax.

In May 2006 the Company introduced a deadline for both Prudential and Scottish Amicable mortgage endowment complaints. In line with the time limit prescribed by the FSA and the ABI, impacted customers have three years to lodge a mis-selling complaint from the date they receive their first "red" letter indicating that there is a high risk their mortgage endowment may not achieve its projected final value.

THE PRUDENTIAL ASSURANCE COMPANY LIMITED

Notes on the financial statements (continued)

Guaranteed Annuities

The Company used to sell guaranteed annuity products in the UK and held a provision of £42m at 31 December 2008, within the main with-profits fund to honour guarantees on these products. The Company's main exposure to guaranteed annuities in the UK is through the Scottish Amicable Insurance Fund (SAIF) and a provision of £391m was held in SAIF at 31 December 2008, to honour the guarantees. As SAIF is a separate sub-fund of the Company's long-term business fund, this provision has no impact on shareholders.

Guarantees and Commitments

During 2008 the Company entered into a credit facility agreement whereby it will lend up to £500m, at any time, in the form of subscription to Senior Notes issued under Prudential plc's £5,000 million Medium Term Note programme or of an unsecured senior loan to Prudential plc, Prudential Capital plc or other subsidiaries of Prudential plc. The purpose of the facility is to provide funding at Prudential Group level if the debt markets are closed to external issuance or if commercial paper issuance is difficult or not practicable. The commitment period is until further notice and subject to annual review by the Company's Board. The facility is repayable on demand and the borrowers can repay at any time at par plus break costs.

The Company has provided, from time to time, other guarantees and commitments to third parties entered into in the normal course of business but the directors do not consider that the amounts involved are significant.

Inherited Estate

The assets of the with-profits sub-fund (WPSF) within the long-term fund of the Company comprise the amounts that it expects to pay out to meet its obligations to existing policyholders and an additional amount used as working capital. The amount payable over time to policyholders from the WPSF is equal to the policyholders' accumulated asset shares plus any additional payments that may be required by way of smoothing or to meet guarantees. The balance of the assets of the WPSF is called the 'inherited estate' and has accumulated over many years from various sources.

The inherited estate, as working capital, enables the Company to support with-profits business by providing the benefits associated with smoothing and guarantees, by providing investment flexibility for the fund's assets, by meeting the regulatory capital requirements that demonstrate solvency and by absorbing the costs of significant events or fundamental changes in its long-term business without affecting the bonus and investment policies. The size of the inherited estate fluctuates from year to year depending on the investment return and the extent to which it has been required to meet smoothing costs, guarantees and other events.

Prudential Group, of which the Company is a part, announced in March 2006 that it had begun a process to determine whether it could achieve greater clarity as to the status of the inherited estate through reattribution. In June 2008 Prudential Group announced that it did not believe that it was in the interests of current or future policyholders or shareholders to continue the reattribution process. This announcement reflects the Company's overriding priority which is to maintain the long-term financial security of the WPSF and to continue delivering strong performance for the benefit of its policyholders.

Support of Long-term Business Funds by Shareholders' Funds

In 1997, the business of Scottish Amicable Life Assurance Society, a mutual society, was transferred to the Company. In effecting the transfer, a separate sub-fund, the Scottish Amicable Insurance Fund (SAIF), was established within the Company's long-term business fund. This sub-fund contains all the with-profits business and all other pension business that was transferred. No new business has been or will be written in the sub-fund and the sub-fund is managed to ensure that all the invested assets are distributed to SAIF policyholders over the lifetime of the SAIF policies. With the exception of certain amounts in respect of the unithised with-profits life business, all future earnings arising in SAIF are retained for SAIF policyholders. Any excess (deficiency) of revenue over expense within SAIF during a period is offset by a change in the SAIF technical provisions (no FFA is shown for SAIF in 2008 because

THE PRUDENTIAL ASSURANCE COMPANY LIMITED

Notes on the financial statements (continued)

technical provisions are set at a level at which the realistic working capital is zero). Shareholders have no interest in the profits of SAIF but are entitled to the investment management fees paid on this business. With the exception of certain guaranteed annuity products mentioned earlier in this note, the majority of SAIF with-profits policies do not guarantee minimum rates of return to policyholders.

Should the assets of SAIF be inadequate to meet the guaranteed benefit obligations to the policyholders of SAIF, the Company's long-term fund would be liable to cover any such deficiency. Due to the quality and diversity of the assets in SAIF, and the ability of SAIF to revise guaranteed benefits in the event of an asset shortfall, the directors believe that the probability of either the Company's long-term fund or the Company's shareholders' funds having to contribute to SAIF is remote.

32. Financial assets and liabilities

A. Financial instruments – designation and fair values

All financial assets of the Company are designated as either fair value through profit and loss or loans and receivables. Financial liabilities are designated as either fair value through profit and loss, amortised cost or investment contracts with discretionary participation features accounted for under FRS 26 and the ABI SORP as described in the Accounting Policies section.

2008	Fair value through profit and loss £m	Loans and receivables £m	Total carrying value £m	Fair value £m

Notes

- (i) As at 31 December 2008, £457m (2007: £537m) of convertible bonds were included in debt securities. There were no convertible bonds included in borrowings.
- (ii) Loans and receivables are reported net of allowance for loan losses of £28m (2007: £4m)
- (iii) It is impractical to determine fair value of investment contracts with discretionary participation features due to the lack of a reliable basis to measure such features.
- (iv) For financial liabilities designated as fair value through profit and loss there was no impact on profit from movements in credit risk during 2008 and 2007.

Determination of fair value

The fair values of the financial assets and liabilities as shown in the table above have been determined on the following bases.

The fair values of the financial instruments for which fair valuation is required under UK GAAP and which are in an active market are determined by the use of current market bid prices for quoted investments, or by using quotations from independent third parties, such as brokers and pricing services. If the market for a financial asset is not active, fair value is established using valuation techniques. These include financial investments which are not quoted on active markets and financial investments for which markets are no longer active as a result of market conditions e.g. market illiquidity. The valuation techniques include the use of recent arm's length transactions, reference to other instruments that are substantially the same, discounted cash flow analysis, option adjusted spread models and if applicable enterprise valuation and may include a number of assumptions relating to variables such as credit risk and interest rates. Changes in assumptions relating to these variables could positively or negatively impact the reported fair value of these instruments. The source of pricing for the financial investments valued using valuation techniques could be from using quotations from independent third parties, such as brokers and pricing services or by using valuation techniques modelled internally. Priority is given to publicly available prices from independent sources, when available but overall, the source of pricing is chosen with the objective of

THE PRUDENTIAL ASSURANCE COMPANY LIMITED

Notes on the financial statements (continued)

arriving at a fair value measurement which reflects the price at which an orderly transaction would take place between market participants on the measurement date.

The loans and receivables have been shown net of provisions for impairment where applicable. The fair value of loans has been estimated from discounted cash flows expected to be received. The rate of discount used was the market rate of interest.

The estimated fair value of derivative instruments reflects the estimated amount the Company would receive or pay in an arm's length transaction. The amount is determined using quotations from independent third parties or valued internally using standard market practices.

The fair value of borrowings is based on quoted market prices, where available.

The fair value of the financial liabilities of the Company is determined using discounted cash flows of the amounts expected to be paid.

Use of valuation techniques

The carrying value of financial investments (including derivative liabilities) on the balance sheet of the Company which are not quoted on active markets and for which fair value is determined using internal valuation techniques, or is provided by brokers or pricing services, where the specific securities have been valued using valuation techniques by these third party providers is £13,208m (2007: £10,110m) of which £13,188m is in the with-profits sub-fund. In 2007 all the financial investments not quoted on active markets were in the with-profits sub-fund.

The majority of the investments valued using valuation techniques were debt securities. These debt securities include private debt securities such as private placements, project finance, asset securitisations and local authority securities. The securities are mainly long-dated and not regularly traded and are valued internally using market standard practices. The majority of the debt securities above are valued using matrix pricing, which is based on assessing credit quality of the underlying borrower to derive a suitable discount rate relative to government securities. Under matrix pricing, the debt securities are priced by taking the credit spreads on comparable quoted public debt securities and applied to the equivalent debt instruments factoring a specified liquidity premium. The majority of the parameters used in this valuation technique are readily observable in the market and, therefore, are not subject to interpretation.

Of the debt securities valued using valuation techniques held by the with-profits sub-fund of £10,310m at 31 December 2008 (2007: £8,764m), £8,317m (2007: £7,384m) have been priced by independent third parties and £1,993m (2007: £1,380m) determined using internal valuation techniques.

In accordance with the Group's Risk Framework, which the Company follows, all internally generated calculations are subject to independent assessment by the Group's Fair Value Committees which comprise members who are independent of the fund managers involved in the day-to-day trading in these assets.

The investments other than debt securities valued using valuation techniques relate to equity securities and other investments which included property and other partnerships in investment pools and venture investments. These investments are valued using valuation techniques which apply less of readily observable market factors and more non-observable factors than the matrix pricing technique as used for the majority of the debt securities.

The total amount of the change in fair value estimated using valuation techniques, including valuation techniques based on assumptions not wholly supported by observable market prices or rates, recognised in the long-term business technical account in 2008 was a gain of £605m (2007: a gain of £434m) for the with-profits investments. The gain in 2008 reflects an underlying loss which is more than offset by the exchange gains of the foreign currency denominated investments of the with-profits fund. Changes in fair value of these investments for the with-profits fund are reflected in the transfer to or from the fund for future appropriations and have no direct effect on the profit or loss attributable to shareholders or shareholders' equity.

The total amount of the change in fair value estimated using valuation techniques, including valuation techniques based on assumptions not wholly supported by observable market prices or rates, recognised in the non-technical account in 2008 and which was attributable to shareholders, was a gain of £3m (2007: Nil).

THE PRUDENTIAL ASSURANCE COMPANY LIMITED

Notes on the financial statements (continued)

The 2007 comparatives differ from the previously published information for the inclusion of the financial investments for which prices have been provided by independent third parties, such as pricing services and brokers, and for which the prices have been derived using valuation techniques by these providers. The previously published 2007 information included only the financial investments valued internally using valuation techniques.

Interest income and expense

The interest income on financial assets not at fair value through profit and loss was £678m for the year ended 31 December 2008 (2007: £374m).

The interest expense on financial liabilities not at fair value through profit and loss was £9m for the year ended 31 December 2008 (2007: £8m).

B. Market Risk

The financial assets and liabilities attaching to the Company's life assurance business are, to varying degrees, subject to market risk that may have a material effect on the profit or loss and equity.

Market risk is the risk that the fair value or future cash flows of a financial instrument or, in the case of liabilities of insurance contracts, their carrying value will fluctuate because of changes in market prices.

Market risk comprises three types of risk, namely:

- Interest rate risk: due to changes in market interest rates,
- Currency risk: due to changes in foreign exchange rates, and
- Other price risk: due to fluctuations in market prices (other than those arising from interest rate risk or currency risk).

With-profits business

The shareholder results of the Company's with-profits business are sensitive to market risk only through the indirect effect of investment performance on declared policyholder bonuses. The investment assets of the Company's with-profits fund are subject to market risk. However, changes in their carrying value, net of the related changes to asset-share liabilities of with-profit contracts, affect the level of funds for future appropriations, which is accounted for as a liability, movements in its value do not affect shareholders' profit or shareholders' funds.

The shareholder results of the Company's with-profits fund correspond to the shareholders' share of the cost of bonuses declared on the with-profits business. This currently corresponds to one-ninth of the cost of bonuses declared.

Investment performance is a key driver of bonuses, and hence the shareholders' share of cost of bonuses. Due to the 'smoothed' basis of bonus declaration the sensitivity to investment performance in a single year is low. However, over multiple periods it is important.

SAIF

SAIF is a ring-fenced fund in which, apart from asset management fees, shareholders have no interest. Accordingly, the Company's profit and shareholders' funds are insensitive to the direct effects of market risk attaching to SAIF's assets and liabilities.

Shareholder-backed non-profit sub-fund

The Company's non-profit sub-fund principally comprises annuity business previously written by Scottish Amicable Life, credit life, unit-linked and other non-participating business. The financial assets covering the liabilities for those types of business are subject to market risk. The liabilities for annuity contracts are subject to market risk arising from changes in the returns of the attaching assets. Except mainly to the extent of any minor asset/liability duration mismatch, and exposure to credit risk, the sensitivity of the Company's non-profit sub-fund's annuity business' results to market risk for movements in the carrying value of liabilities and covering assets is broadly neutral on a net basis.

The liabilities of the unit-linked business change in line with the matching linked assets. Other liabilities of the Company's non-profit sub-fund are broadly insensitive to market risk.

The principal items affecting the results of the Company's non-profit sub-fund are mortality experience and assumptions and credit risk.

THE PRUDENTIAL ASSURANCE COMPANY LIMITED

Notes on the financial statements (continued)

Interest rate risk

The following table shows an analysis of the classes of financial assets and liabilities and their direct exposure to interest rate risk. Each applicable class of the Company's assets or liabilities are analysed between those exposed to fair value interest rate risk, cash flow interest rate risk and those with no direct interest rate risk exposure.

2008	Fair value interest rate risk	Cash flow interest rate risk	Not directly exposed to interest rate risk	Total
	£m	£m	£m	£m

The table below shows the maturity profile for investment contracts on an undiscounted basis to the nearest billion. This maturity profile has been based on the cash flow projections of expected benefit payments as part of the determination of the value of in-force business when preparing the EEV basis results.

	1 year or less	After 1 year to 5 years	After 5 years to 10 years	After 10 years to 15 years	After 15 years to 20 years	Over 20 years	Total carrying value
	£bn	£bn	£bn	£bn	£bn	£bn	£bn
2008							
Life assurance investment contracts	2	9	12	12	11	16	62
2007							
Life assurance investment contracts	3	12	16	16	16	25	88

This table has been prepared on an undiscounted basis and accordingly the amounts shown for life assurance investment contracts differ from those included in the balance sheet. Durations of long-term business contracts, covering both insurance and investment contracts, on a discounted basis are included below.

Durations of long-term business contracts on a discounted basis:

With the exception of most unitised with-profit bonds and other whole of life contracts the majority of the contracts of the Company have a contract term. However, in effect, the maturity term of contracts reflects the earlier of death, maturity, or lapsation. In addition, with-profit contracts include projected future bonuses based on current investment values. The actual amounts payable will vary with future investment performance of SAIF and the WPSF. Instead the Company uses cash flow projections of expected benefit payments as part of the determination of the value of in-force benefits when preparing the European Embedded Value basis results for the Prudential Group. The following table shows the maturity profile of the cash flows used for insurance contracts i.e. those containing significant insurance risk, and investment contracts, which do not contain significant insurance risk:

2008	With-profits business			Other		Total
	Insurance contracts	Investment contracts	Total	Insurance contracts	Investment contracts	
	%	%	%	%	%	%
0-5 years	47	26	38	30	32	30
5-10 years	26	23	25	23	22	23
10-15 years	13	19	15	18	19	18
15-20 years	7	15	10	12	12	12
20-25 years	4	11	7	8	7	8
Over 25 years	3	6	5	9	8	9

THE PRUDENTIAL ASSURANCE COMPANY LIMITED

Notes on the financial statements (continued)

2007	With-profits business			Total	Other		
	Insurance contracts	Investment contracts	Insurance contracts		Investment contracts	Total	
	%	%	%		%	%	
0-5 years	47	25	38	32	33	32	
5-10 years	27	23	26	24	22	23	
10-15 years	13	19	16	18	19	18	
15-20 years	7	15	10	12	14	13	
20-25 years	4	11	6	7	5	7	
Over 25 years	2	7	4	7	7	7	

Notes:

- (i) The cash flow projections of expected benefit payments used in the maturity profile table above are from in-force business and exclude the value of future new business, including vesting of internal pension contracts.
- (ii) Benefit payments do not reflect the pattern of bonuses and shareholder transfers in respect of the with-profits business.
- (iii) Investment contracts under Other comprise unit-linked and similar contracts.
- (iv) For business with no maturity term included within the contracts, for example with-profits investment bonds such as Prudence Bond, an assumption is made as to likely duration based on prior experience.

Sensitivity to interest rate movement

As described above, the net exposure to interest rate movement for the Company is very substantially ameliorated by virtue of the close matching of assets with appropriate duration to the liabilities.

The close matching by the Company of assets of appropriate duration to its non-profit sub fund's annuity liabilities is based on maintaining economic and regulatory capital. The measurement of liabilities under capital reporting requirements and UK GAAP is not the same, with contingency reserves and some other margins for prudence within the assumptions required under the FSA regulatory solvency basis not included for UK GAAP reporting purposes. As a result UK GAAP's shareholders' funds are higher than regulatory capital and therefore more sensitive to interest rate risk.

In the light of recent market conditions, the Company has extended the range of the movements in interest rates that are reasonably possible to occur at 31 December 2008 in its interest rate sensitivity analysis. Consequently, in addition to the movement in interest rates of 1% as applied at 31 December 2007, for 2008, the Company has also estimated the sensitivity to movement in interest rates of 2%. The estimated sensitivity of the shareholder-backed business to a movement in interest rates of 1% as at 31 December 2008 and 2007 and of a movement in interest rates of 2% as at 31 December 2008 are as follows:

	2008		2007	
	Fall of 1% £m	Rise of 1% £m	Fall of 2% £m	Rise of 2% £m
Carrying value of debt securities and derivatives	236	(204)	512	(382)
Long term business provision	(190)	162	(415)	302
Related tax effects	(13)	12	(28)	23
Net sensitivity of profit after tax and shareholders' funds	33	(30)	69	(57)

Currency Risk

As at 31 December 2008, the Company held 42% and 2% (2007: 39% and 3%) of its financial assets and financial liabilities respectively, in currencies, mainly US dollar and Euro, other than the functional currency of the relevant business unit.

The financial assets, of which 92% (2007: 93%) are held by the with-profit fund, allow the fund to obtain exposure to foreign equity markets.

THE PRUDENTIAL ASSURANCE COMPANY LIMITED

Notes on the financial statements (continued)

The financial liabilities, of which 87% (2007: 87%) are held by the with-profit fund, mainly relate to investment contracts with discretionary participation features.

The exchange risks inherent in these exposures are mitigated through the use of derivatives, mainly forward currency contracts.

Other Price Risk – Equities

In addition the shareholder backed portfolio of the Company includes equity securities. Similar to the sensitivity analysis to interest rate movement above, the Company has also extended the range of reasonably possible movements in the value of equity securities at 31 December 2008. In addition to the movement of 10% as applied at 31 December 2007, for 2008, the Company has also estimated the sensitivity to movements of 20% and 40%. Excluding any second order effects on the measurement of the liabilities for future cash flow to the policyholder, a 10% fall in their value at 31 December 2008 and 2007 and a 20% and 40% fall in their value at 31 December 2008 would have given rise to the following effects on pre-tax profit, profit after tax, and shareholders' equity.

	Decrease of 40% £m	2008 Decrease of 20% £m	Decrease of 10% £m	2007 Decrease of 10% £m
Pre-tax profit	(0.8)	(0.4)	(0.2)	(1.0)
Related deferred tax effects	0.2	0.1	0.1	0.3
Net sensitivity of profit after tax and shareholders' funds	(0.6)	(0.3)	(0.1)	(0.7)

A 10%, 20% or 40% increase in their value would have an approximately equal and opposite effect on profit and shareholders' equity to the sensitivities shown above.

C. Derivatives and Hedging

The Company uses derivatives for efficient portfolio management to obtain cost effective and efficient exposure to various markets and to manage exposure to interest rate, currency, credit and other business risks.

The Company uses various interest rate derivative instruments such as interest rate swaps to reduce exposure to interest rate volatility.

The Company also uses various currency derivatives in order to limit volatility due to foreign currency exchange rate fluctuations arising on securities denominated in currencies other than sterling.

The Company also holds interest-rate sensitive investments that contain credit risks on which a certain level of defaults is expected. In order to manage the default risk on certain underlying assets and hence reduce the amount of regulatory capital held to support the assets the Company purchases swaptions.

As part of the efficient portfolio management of the PAC with-profits fund, the fund may, from time to time, invest in cash-settled forward contracts over Prudential plc shares, which are accounted for consistently with other derivatives. This is in order to avoid a mismatch of the with-profits investment portfolio with the investment benchmarks set for its equity-based investment funds. The contracts will form part of the long-term investments of the with-profits fund. The contracts are subject to a number of limitations for legal and regulatory reasons.

All over-the-counter derivative transactions are conducted under standardised ISDA (International Swaps and Derivatives Association Inc) master agreements and the Group has collateral agreements between the individual group entities, of which the Company is one, and relevant counterparties in place under each of these market master agreements.

THE PRUDENTIAL ASSURANCE COMPANY LIMITED

Notes on the financial statements (continued)

The total fair value balances of derivative assets and derivative liabilities are shown in Note 16. The notional amount of the derivatives were as follows at 31 December 2008 and 31 December 2007:

2008	Notional amount on which future payments are based	
	Asset £m	Liability £m
Cross-currency swaps	61	77
Equity index call options	17	32
Swaptions	980	980
Futures	3,265	4,045
Forwards	13,759	15,848
Equity options	2	4
Credit default swaps	118	14
Total return swaps	479	514
Interest rate swaps	2,945	2,993

2007	Notional amount on which future payments are based	
	Asset £m	Liability £m
Cross-currency swaps	61	55
Equity index call options	-	23
Swaptions	1,125	1,125
Futures	1,904	2,176
Forwards	16,984	17,367
Single stock options	-	-
Credit default swaps	4,181	59
Total return swaps	956	956
Interest rate swaps	2,559	2,761

During 2008 a delta hedging arrangement was put in place, the main objective being to protect the Pillar II solvency of the With-Profits business against falls in the equity markets. A theoretical equity put option representing the liabilities has been determined, based on FTSE 100 and a strike price of 3000. The Company sells the appropriate number of futures contracts so that the movement in market value mirrors that of the benchmark put option. The Company is therefore hedging the delta of the liabilities.

The required delta hedging position is then compared to the actual futures position on a daily basis, and the mismatch is calculated. If the mismatch is significant, then an assessment is made as to whether or not to address the balance, and how much to rebalance. Automatic rebalancing is triggered if the mismatch between the actual and required position is greater than £500m.

D. Credit risk

Debt Securities and Other Fixed Income Securities

The following table summarises by rating the securities held by the Company as at 31 December 2008 and 2007.

	With-profits			With-profits		
	sub fund £m	Other funds £m	Total 2008 £m	sub fund £m	Other funds £m	Total 2007 £m
S&P – AAA	6,777	1,938	8,715	8,330	834	9,164
S&P – AA+ to AA-	2,028	278	2,306	2,331	231	2,562
S&P – A+ to A-	6,629	688	7,317	5,254	436	5,690
S&P – BBB+ to BBB-	4,498	301	4,799	3,299	154	3,453
S&P – Other	836	6	842	849	-	849
	20,768	3,211	23,979	20,063	1,655	21,718
Moody's – Aaa	450	78	528	688	19	707
Moody's – Aa1 to Aa3	416	55	471	221	13	234
Moody's – A1 to A3	265	21	286	393	26	419
Moody's – Baa1 to Baa3	181	21	202	220	17	237
Moody's – Other	15	1	16	68	-	68
	1,327	176	1,503	1,590	75	1,665
Fitch	215	21	236	238	18	256

Total debt securities and other fixed income securities	24,773	3,475	28,248	24,445	1,803	26,248

THE PRUDENTIAL ASSURANCE COMPANY LIMITED

Notes on the financial statements (continued)

In the table above S&P ratings have been used where available. For securities where S&P ratings are not immediately available those produced by Moody's and then Fitch have been used as an alternative.

Where no external ratings are available internal ratings produced by the Prudential Group's asset management operations, which are prepared on a comparable basis to external ratings, are used where possible. Of the total debt securities held at 31 December 2008 which are not externally rated, £723m (2007: £873m) were internally rated AAA to A-, £1,424m (2007: £1,427m) were internally rated BBB+ to B-, £8m (2007: £Nil) were internally rated as Other and £375m (2007: £309m) were unrated. The majority of the unrated debt security investments were held by the Company's with-profits fund and relate to convertible debt and other investments which are not covered by rating analysts nor have an internal rating attributed to them.

As detailed in section B the primary sensitivity of profit or loss and shareholders' equity of the Company relates to non-linked shareholder-backed business which covers the "other funds" in the table above.

Loans and receivables

Of the total loans and receivables held £7m (2007: £3m) are past their due date but have not been impaired. 95% of the loans and receivables that are past due but not impaired are less than one year past their due date for 2008. All the loans and receivables that were past due but not impaired were less than one year past their due date for 2007. The Company expects full recovery of these loans and receivables. Financial assets that would have been past due or impaired had the terms not been renegotiated amounted to £Nil (2007: £Nil).

In accordance with accounting policy, impairment reviews were performed for loans and receivables. During the year ended 31 December 2008, impairment losses of £28m (2007: £4m) were recognised for loans and receivables.

Securities lending and reverse repurchase agreements

The Company has entered into securities lending (including repurchase agreements) whereby blocks of securities are loaned to third parties, primarily major brokerage firms. The amounts above the fair value of the loaned securities required to be held as collateral by the agreements, depend on the quality of the collateral, calculated on a daily basis. The loaned securities are not removed from the Company's balance sheet, rather they are retained within the appropriate investment classification. Collateral, typically consists of cash, debt securities, equity securities and letters of credit. At 31 December 2008, the Company had lent £7,473m (2007: £7,838m) of securities and held collateral under such agreements of £7,644m (2007: £8,279m).

At 31 December 2008, the Company had entered into reverse repurchase transactions under which it purchased securities and had taken on the obligation to resell the securities for the purchase price, £267m (2007: £637m), together with accrued interest.

Collateral and pledges under derivative transactions

At 31 December 2008, the Company had pledged £Nil (2007: £56m) for liabilities and held collateral of £194m (2007: £52m) in respect of over-the-counter derivative transactions.

Reinsurer's share of technical provisions

The majority of the reinsurers' share of technical provisions relate to cessions to subsidiaries of the Company or other group companies. See Note 18.

Of the reinsurer's share of technical provisions at 31 December 2008 of £14,655m (2007: £15,339m), 2% (2007: 2%) of the balance relates to companies outside of the Prudential Group and of this 49% (2007: 84%) of the balances were from reinsurers with S&P's rating of AA- and above, based on the ratings at the time of signing these financial statements.

THE PRUDENTIAL ASSURANCE COMPANY LIMITED

Notes on the financial statements (continued)

E. Risk Management

The Company's business involves the acceptance and management of risk. The Company has in place a risk management process, which is undertaken in accordance with the Group Risk Framework adopted by the Prudential Group in 1999.

A number of risk factors affect the Company's operating results and financial condition. The financial risk factors affecting the Company include the effects of market risk, credit risk and liquidity risk on the financial instruments of the Company.

The Company uses derivatives to facilitate efficient portfolio management or to reduce investment risk. The most widely used derivatives by the Company are exchange traded futures and currency forwards.

The Company also uses over-the-counter swaps (including total return swaps), options, swaptions and warrants.

It is the Company's policy that cash or corresponding assets cover amounts at risk through derivative transactions. Derivative financial instruments used to facilitate efficient portfolio management and for investment purposes are carried at fair value with changes in fair value included in the profit and loss account. The Company has not applied hedge accounting to its derivatives.

Market risk

Market risk is the risk that arises from adverse changes in the value of, or income from, assets and changes in interest rates or exchange rates.

The primary market risks that the Company faces are equity risk and interest rate risk because most of its assets are investments that are either equity type of investments and subject to equity price risk, or bonds, mortgages or cash deposits, the values of which are subject to interest rate risk. The amount of risk borne by the Company's shareholders depends on the extent to which its customers share the investment risk through the structure of the Company's products.

The split of the Company's investments between equity investments and interest-sensitive instruments depends principally on the type of liabilities supported by those investments and the amount of capital the Company has available. This mix of liabilities allows the Company to invest a substantial portion of its investment funds in equity and real estate investments that the Company believes produce greater returns over the long term. On the other hand the Company has some liabilities that contain guaranteed returns which generally will be supported by fixed income investments.

Credit risk

Credit risk is the risk of loss to the Group if another party fails to perform its obligations, or fails to perform them in a timely manner. The Company's long-term fund holds large amounts of interest rate sensitive investments that contain credit risk on which a certain level of defaults is expected. These expected losses are considered when the Company determines the crediting rates, deposit rates and premium rates for the products that will be supported by these assets. Certain over-the-counter derivatives contain a credit risk element that is controlled through evaluation of collateral agreements and master netting agreements on interest rate and currency swaps. The Company is also exposed to credit-related losses in the event of non-performance by counterparties.

Liquidity risk

Liquidity risk is the risk that the Company may be unable to meet payment of obligations in a timely manner at a reasonable cost or the risk of unexpected increases in the cost of funding the portfolio at appropriate maturities or rates. Liquidity management in the Company seeks to ensure that, even under adverse conditions, the Company has access to the funds necessary to cover surrenders, withdrawals and maturing liabilities.

In practice, most of the Company's assets are marketable securities. This, combined with the fact that a large proportion of the liabilities contain discretionary surrender values or surrender charges, reduces the liquidity risk.

Notes on the financial statements (continued)

33. Capital Requirements and Management

Regulatory capital requirements apply at both an individual company level and at the Prudential Group level, of which the Company is a part, for life assurance and investment management business. The Prudential Group is currently subject to the solvency requirements of the Insurance Groups Directive (IGD) as implemented by the FSA. Under the IGD a parent company continuous solvency test is applied. Under this test the surplus unrestricted capital held in each of the regulated subsidiaries, including the Company, is aggregated with the free assets of non-regulated subsidiaries. From this total, Prudential Group borrowings are deducted, other than subordinated debt issues which qualify as capital.

In addition to obligations under subsidiary and Prudential Group regulatory requirements, the Prudential Group applies an economic framework to its management of capital. Economic capital provides a realistic and consistent view of the Group's capital requirements, allowing for diversification benefits.

At the Company level, the FSA rules which govern the prudential regulation of insurance form part of the Prudential Sourcebook for Insurers, the General Prudential Sourcebook and Interim Prudential Sourcebook for Insurers. Overall, the net requirements of the General Prudential Sourcebook are intended to align the capital adequacy requirements for insurance business more closely with those of banking and investment firms and building societies, for example, by addressing tiers of capital, rather than looking at net admissible assets. An insurer must hold capital resources equal at least to the Minimum Capital Requirement (MCR).

The Prudential Sourcebook for Insurers also contains rules on Individual Capital Assessments. Under these rules and the rules of the General Prudential Sourcebook all insurers must assess for themselves the amount of capital needed to back their business. If the FSA views the results of this assessment as insufficient, it may draw up its own Individual Capital Guidance for a firm, which can be superimposed as a requirement.

With-Profits Sub-Fund, SAIF and Defined Charge Participating Sub-Fund

Under FSA rules, insurers with with-profits liabilities of more than £500m must hold capital equal to the higher of the MCR and the Enhanced Capital Requirement (the "ECR"). The ECR is intended to provide a more risk responsive and "realistic" measure of a with-profit insurers capital requirements, whereas the MCR is broadly speaking equivalent to the previous required minimum margin under the Interim Prudential Sourcebook and satisfies the minimum EU Standards.

Determination of the ECR involves the comparison of two separate measurements of the firm's resources requirement, which the FSA refers to as the "twin peaks" approach. The two separate peaks are:

- (i) the requirement comprised by the mathematical reserves plus the "Long-Term Insurance Capital Requirement" (the "LTICR"), together known as the "regulatory peak"; and
- (ii) a calculation of the "realistic" present value of the insurer's expected future contractual liabilities together with projected "fair" discretionary bonuses to policyholders, plus a risk capital margin, together known as the "realistic peak".

Available capital of the WPSF and SAIF and DCPSF of £5.4bn (2007: £8.7bn) represents the excess of assets over liabilities on the FSA realistic basis. Unlike the previously discussed FRS 27 basis, realistic liabilities on the regulatory basis include the shareholders' share of future bonuses. These amounts are shown before deduction of the risk capital margin (RCM) which is £2.0bn (2007: £2.0bn) at 31 December 2008.

The FSA's basis of setting the RCM is to target a level broadly equivalent to a Standard & Poor's credit rating of BBB and to judge this by ensuring there are sufficient assets to absorb a 1 in 200 year event. The RCM calculation achieves this by setting rules for the determination of margins to cover defined stress changes in asset values and yields for market risk, credit risk and termination risk for with-profits policies.

The Company has discretion in its management actions in the case of adverse investment conditions. Management actions encompass, but are not confined to, investment allocation decisions, levels of reversionary bonuses, crediting rates and total claim values. To illustrate the flexibility of management actions, rates of regular bonus are determined for each type of policy primarily by targeting them at a

THE PRUDENTIAL ASSURANCE COMPANY LIMITED

Notes on the financial statements (continued)

prudent proportion of the long-term expected future investment return on the underlying assets. The expected future investment return is reduced as appropriate for each type of policy to allow for items such as expenses, charges, tax and shareholders' transfers. However, the rates declared may differ by product type, or by date of payment of the premiums or date of issue of the policy, if the accumulated annual bonuses are particularly high or low relative to a prudent proportion of the achieved investment return.

When target bonus levels change, the Company's board has regard to the overall financial strength of the long-term fund when determining the length of time over which it will seek to achieve the amended product target bonus level.

In normal investment conditions, the Company expects changes to regular bonus rates to be gradual over time and changes are not expected to exceed one per cent per annum over any year. However, discretion is retained as to whether or not a regular bonus is declared each year, and there is no limit on the amount by which regular bonus rates can be changed.

As regards smoothing of maturity and death benefits, in normal circumstances the Company does not expect most pay-out values on policies of the same duration to change by more than 10 per cent up or down from one year to the next, although some larger changes may occur to balance pay-out values between different policies. Greater flexibility may be required in certain circumstances, for example following a significant rise or fall in market values (either sudden or over a period of years) and in such situations the Company's board may decide to vary the standard bonus smoothing limits to protect the overall interests of policyholders.

For surrender benefits, any substantial fall in the market value of the assets of the with-profits sub-fund would lead to immediate changes in the application of MVRs for accumulating with-profits policies, firstly to increase the size of MVRs already being applied and, secondly, to extend the range of policies for which an MVR is applied.

Non-Profit Sub-Fund

The available capital of £33m (2007: £86m) reflects the excess of regulatory basis assets over liabilities of the Company. The regulatory capital resources requirement of £300m (2007: £240m) is covered in part (as is permitted by the FSA Regulations) by assets in the shareholder funds. The available capital and capital resources requirement is monitored during the year. In addition, a realistic assessment of available capital and capital requirements sufficient to cover a 1 in 200 year event is undertaken. Additional capital is sought from the parent company as necessary.

The capital requirement required by regulation was maintained during the year.

THE PRUDENTIAL ASSURANCE COMPANY LIMITED

Notes on the financial statements (continued)

The Company's capital position for life assurance businesses with reconciliations to shareholders' funds is shown below. Available capital for each fund is determined by reference to the FSA regulations at 31 December 2008 and 2007.

31 December 2008							
	SAIF £m	WPSF and DCPSF £m	Total with- profits fund £m	Non-profit sub-fund £m	Total life assurance £m	Shareholders' funds £m	Company total £m
Shareholders' funds							
Held outside long-term funds							
Net assets	-	-				2,728	2,728
Goodwill	-	-				-	-
Total	-	-				2,728	2,728
Held in long-term funds (note i)	-	-		509	509	-	509
Total shareholders' funds	-	-		509	509	2,728	3,237
Adjustments to regulatory basis							
Funds for future appropriation (note ii)	-	8,691	8,691		8,691		
Shareholders' share of realistic liabilities	-	(2,028)	(2,028)		(2,028)		
Deferred acquisition costs of non-participating business and intangible assets (distribution rights and licence) not recognised for regulatory reporting purposes	(3)	(114)	(117)	(309)	(426)		
Adjustment from FRS17 basis pension surplus attributable to WPSF to pension liability for regulatory purposes	-	(287)	(287)		(287)		
Valuation difference on PAL between UKGAAP basis and regulatory basis	-	(1,350)	(1,350)		(1,350)		
Other adjustments to restate these amounts to a regulatory basis (with SAIF and the WPSF on a Peak 2 realistic basis) (note iii)	3	450	453	(167)	286		
Total adjustments	-	5,362	5,362	(476)	4,886		
Total available capital resources of life assurance businesses on FSA regulatory bases	-	5,362	5,362	33	5,395

Held in long-term funds (note i)	-	-	-	172	172	-	172
Total shareholders' funds	-	-	-	172	172	3,118	3,290
Adjustments to regulatory basis							
Funds for future appropriation (note ii)	-	14,410	14,410	-	14,410		
Shareholders' share of realistic liabilities	-	(4,178)	(4,178)	-	(4,178)		
Deferred acquisition costs of non-participating business and intangible assets (distribution rights and licence) not recognised for regulatory reporting purposes	(4)	(16)	(20)	(138)	(158)		
Adjustment from FRS17 basis pension surplus attributable to WPSF to pension liability for regulatory purposes	-	(530)	(530)	-	(530)		
Valuation difference on PAL between UKGAAP basis and regulatory basis	-	(1,117)	(1,117)	-	(1,117)		
Other adjustments to restate these amounts to a regulatory basis (with SAIF and the WPSF on a Peak 2 realistic basis) (note iii)	4	149	153	52	205		
Total adjustments	-	8,718	8,718	(86)	8,632		
Total available capital resources of life assurance businesses on FSA regulatory bases	-	8,718	8,718	86	8,804		

Notes

- (i) The term shareholders' funds held in long-term funds refers to the excess of assets over liabilities attributable to shareholders of funds which are required by law to be maintained with segregated assets and liabilities.
- (ii) Other adjustments to shareholders' funds and funds for future appropriation include amounts for the value of non-participating business for with-profits funds, deferred tax, admissibility and other items measured differently on the regulatory basis.
- (iii) Insurance business accounted for as financial instruments under FRS26.

THE PRUDENTIAL ASSURANCE COMPANY LIMITED

STATEMENT OF DIRECTORS' RESPONSIBILITIES IN RESPECT OF THE DIRECTORS' REPORT AND THE FINANCIAL STATEMENTS

The directors are responsible for preparing the Directors' Report and the financial statements in accordance with applicable law and regulations.

Company law requires the directors to prepare financial statements for each financial year. Under that law they have elected to prepare the financial statements in accordance with UK Accounting Standards and applicable law (UK Generally Accepted Accounting Practice).

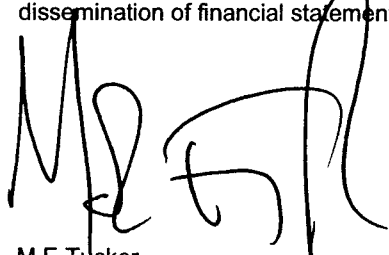

The financial statements are required by law to give a true and fair view of the state of affairs of the Company and of the profit or loss of the Company for that period.

In preparing these financial statements, the directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and estimates that are reasonable and prudent;
- state whether applicable UK Accounting Standards have been followed, subject to any material departures disclosed and explained in the financial statements;
- and prepare the financial statements on the going concern basis unless it is inappropriate to presume that the Company will continue in business.

The directors are responsible for keeping proper accounting records that disclose with reasonable accuracy at any time the financial position of the Company and enable them to ensure that its financial statements comply with the Companies Act 1985. They have general responsibility for taking such steps as are reasonably open to them to safeguard the assets of the Company and to prevent and detect fraud and other irregularities.

The directors are responsible for the maintenance and integrity of the corporate and financial information included on the Company's website. Legislation in the UK governing the preparation and dissemination of financial statements may differ from legislation in other jurisdictions.

M E Tucker
Chairman

THE PRUDENTIAL ASSURANCE COMPANY LIMITED

INDEPENDENT AUDITORS' REPORT TO THE MEMBERS OF THE PRUDENTIAL ASSURANCE COMPANY LIMITED

We have audited the financial statements of The Prudential Assurance Company Limited for the year ended 31 December 2008 which comprise the Profit and Loss Account, the Balance Sheet, the Statement of Total Recognised Gains and Losses, the Reconciliation of Movements in Shareholders' Funds and the related notes. These financial statements have been prepared under the accounting policies set out therein.

This report is made solely to the Company's members, as a body, in accordance with section 235 of the Companies Act 1985. Our audit work has been undertaken so that we might state to the Company's members those matters we are required to state to them in an auditors' report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the Company and the Company's members as a body, for our audit work, for this report, or for the opinions we have formed.

Respective Responsibilities of Directors and Auditors

The directors' responsibilities for preparing the financial statements in accordance with applicable law and UK Accounting Standards (UK Generally Accepted Accounting Practice) are set out in the Statement of Directors' Responsibilities on page 65.

Our responsibility is to audit the financial statements in accordance with relevant legal and regulatory requirements and International Standards on Auditing (UK and Ireland).

We report to you our opinion as to whether the financial statements give a true and fair view and are properly prepared in accordance with the Companies Act 1985. We also report to you whether in our opinion the information given in the Directors' Report is consistent with the financial statements.

In addition we report to you if, in our opinion, the Company has not kept proper accounting records, if we have not received all the information and explanations we require for our audit, or if information specified by law regarding directors' remuneration and other transactions is not disclosed.

We read the Directors' Report and consider the implications for our report if we become aware of any apparent misstatements within it.

Basis of Audit Opinion

We conducted our audit in accordance with International Standards on Auditing (UK and Ireland) issued by the Auditing Practices Board. An audit includes examination, on a test basis, of evidence relevant to the amounts and disclosures in the financial statements. It also includes an assessment of the significant estimates and judgements made by the directors in the preparation of the financial statements, and of whether the accounting policies are appropriate to the Company's circumstances, consistently applied and adequately disclosed.

We planned and performed our audit so as to obtain all the information and explanations which we considered necessary in order to provide us with sufficient evidence to give reasonable assurance that the financial statements are free from material misstatement, whether caused by fraud or other irregularity or error. In forming our opinion we also evaluated the overall adequacy of the presentation of information in the financial statements.

Opinion

In our opinion the financial statements:

- give a true and fair view, in accordance with UK Generally Accepted Accounting Practice, of the state of the Company's affairs as at 31 December 2008 and of its profit for the year then ended; and
- the financial statements have been properly prepared in accordance with the Companies Act 1985; and
- the information given in the Directors' Report is consistent with the financial statements.
