- (2) Not applicable.
- (3) Not applicable.

- (7) The unit pricing methods are described in the regulatory return for PACL with which the linked liabilities are wholly reassured.
- (8) Not applicable.
- (9) Not applicable.
- (10) The unit pricing methods are described in the regulatory return for PACL with which the linked liabilities are wholly reassured.

#### VALUATION BASIS (OTHER THAN FOR SPECIAL RESERVES)

4. At 31 December 2008 the total gross mathematical reserves amounted to  $\pm 191$ m. The lesser of  $\pm 10$ m and 1.0% of the total gross mathematical reserves was therefore equal to  $\pm 1.9$ m.

#### (1) Linked policies

The liability has been taken as the sum of:

- (i) The value of created units at a bid basis price plus the value of investments in the Guaranteed Fund with accrued interest. The created units would be lower than the face value of units for products where actuarial funding is used.
- (ii) A non-unit reserve for mortality and attributable expenses.

#### **Appendix 9.4 (continued)**

(iii) An additional reserve for non-attributable expenses calculated at a homogenous risk group level.

The non-unit reserve is calculated as the value of future attributable expenses and renewal commission less the value of future management charges and the value of that portion of future premiums not allocated to units. Where necessary, the reserve is adjusted to ensure that for an individual policy both currently and at any future date it is not less than the value of created units. In the case of regular premium contracts, premiums are assumed to continue in payment for the remaining term of the contract unless a higher reserve is obtained by assuming immediate cessation of premiums.

The additional reserve for non-attributable expenses is calculated as described in section 6.

#### Annuities in payment

The mathematical reserve for annuities in payment is the present value of the annuities and expenses allowing for inflation.

#### Mortality bases used at 31 December 2008 and 31 December 2007

Annuities are generally valued using a percentage of the 00 series (year of birth) tables for annuitants and pensioners (normal retirements). In order to allow for mortality improvement, improvement factors are applied from 2001. For males, these future improvement factors are in line with 100% of the CMI medium cohort projections, subject to future improvement factors not being less than 2.25% p.a. until age 90, tapering linearly to zero at age 120. For females, future improvement factors not being less than 1.25% p.a. until age 90, tapering linearly to zero at age 120. For impaired lives, an adjustment is made to the annuitant's age to allow for impairment.

(12) There have been no changes to the mathematical reserves at the current valuation date as a result of the changes to the INSPRU rules at 31 December 2006.

#### **OPTIONS AND GUARANTEES**

- 5. (1) Not applicable.
  - (2) Not applicable.
  - (3) Not applicable.
  - (4) All linked products are able to invest in the Guaranteed Fund which is a non-unitised fund currently invested in short dated securities and loans. A rate of interest is published daily. The basic reserve for the Guaranteed Fund at 31 December 2008 was £4.4m. As there is close matching of the assets and the liabilities no further reserve is required for the guarantee.

Total	-	£164,071	£114,642	£393,668	£672,382

#### **Appendix 9.4 (continued)**

- (2) Not applicable.
- (3) Maintenance expenses shown at line 14 of Form 43 are £586,000. The total expense loadings expected to arise in 2009 as calculated in 6.(1) exceed this amount due to the inclusion of prudent margins in the valuation expense assumptions.
- (4) The company is closed to new business.
- (5) In the first instance, expense reserves are calculated on the assumption that Prudential's UK insurance operations will continue to write new business indefinitely and hence that there will be no loss of economies of scale. In this scenario, the expense loadings over the remaining lifetime of the contracts in force at the valuation date are included in the reserves reported in Form 50.

In order to allow for the possibility that the firm will cease to transact new business twelve months after the valuation date, the expense loading is recalculated on the assumption that, over a two year period, unit costs would be reduced by 15% and thereafter loss of economies of scale would result in overall expenses being cut more slowly than the rate at which policies run off. If this revised calculation results in a higher reserve than described in the paragraph above, then the difference is held as an additional reserve. In addition the costs associated with closing to new business, such as redundancy costs or the costs of terminating management agreements, are estimated. To the extent that these costs exceed the projected surplus on prudent assumptions from existing business a further additional reserve is held. At 31 December 2008, an additional reserve of £101,617 was held for the impact of closing to new business.

#### MISMATCHING RESERVES

- 7. (1) and (2) All assets and liabilities are denominated in sterling. There is no currency mismatching.
  - (3) There is no reserve for currency mismatching.
  - (4) For the purpose of calculating the resilience capital requirement under INSPRU 3.1.10R, the most onerous scenario is a combination of a fall in unit prices of 25% and an immediate rise of 75 basis points in the annual yield obtainable on fixed interest securities.
  - (5) Not applicable.
  - (6) A Resilience Capital Requirement of £500,000 has been established.

There was a £421,000 increase in the aggregate amount of the long term liabilities. The assets allocated to match such liabilities decreased in value by £219,000 from the amount of assets shown in F13.

(7) No reserve is required for cashflow mismatching under INSPRU 1.1.34R(2).

#### Appendix 9.4 (continued)

#### **OTHER SPECIAL RESERVES**

8. At 31 December 2008 the total gross mathematical reserves amounted to £191m. The lesser of £10m and 0.1% of the total gross mathematical reserves was therefore equal to £0.19m.

At 31 December 2008, there were no special reserves which met the above criteria.

#### REINSURANCE

- 9. (1) No premiums were paid in 2008 in respect of reinsurance business ceded on a facultative basis to reinsurers not authorised to carry on business in the United Kingdom.
  - (2) The reinsurance treaties shown in the table below meet the FSA criteria for being reported in this section and were in force as at 31 December 2008.

#### Appendix 9.4 (continued)
