At the close of the year 1881 the Quinquennial Division of Profits will take place. All persons whose Proposals have been accepted and the Premiums paid before the 31st December 1881 will participate in the Bonus.

From the results of the operations of the four years of the present Quinquennium, there seems every reason to believe that a very satisfactory Bonus will be declared.

INDUSTRIAL BRANCH.

The Claims of the year amount to £573,837 1s. 9d., while the total amount of Claims paid in this Branch is £3,146,360.

The expenses of conducting the existing business of this Branch are now 31.9 per cent. upon the Premium Income, showing a further reduction from those of last year, and being 10 per cent. less than the amount provided at the last valuation.

These expenses are necessarily higher than those in the Ordinary Branch, as the premiums are collected weekly, but they are still less than those of any other similar Company transacting purely Life Assurance business.

The rate of the New Business charges is upwards of one-half per cent. less than that of last year, but inasmuch as specific provision is made for these charges in the first year's premium, and they are defrayed by new entrants, forming no charge whatever upon renewals, their incidence is of no practical moment.

The process of reducing the Extension Expenses has been continued during the past year. The expenses incurred under this head show a diminution of more than **one-half** per cent., and the same remarks apply to these as to the New Business charges.

The Organization of this Branch is still maintained in a high state of efficiency.

The result of the valuation at the end of the year 1876 completely demonstrated the safety and soundness of the system on which the Company's Industrial Business is carried on.

The Directors have since that date caused statistical returns of the most minute and exhaustive character relating to the transactions of this Branch to be compiled. The books containing these returns have been from time to time examined with an anxious desire to introduce all improvements for the benefit of the Assured which may with safety and propriety be adopted.

The business of the past four years has been attended with the most satisfactory results, and the Directors propose, if the valuation at the close of the year realizes their expectations, to introduce such additional alterations and improvements as they consider can be made with due regard to the stability of the Company.

The retiring Directors are Messrs. HORNE and PUGH, who offer themselves for re-election.

The Auditors, Mr. JAMES ALLANSON and Dr. BABNES, also retire, and offer themselves for re-election.
