PRUDENTIAL ANNUITIES LIMITED

Valuation report pursuant to the Interim Prudential Sourcebook (IPRU(INS)) rule 9.4, 9.31(a) and Appendix 9.4

Valuation Report as at 31 December 2013

1. Introduction

- (1) The investigation relates to 31 December 2013.
- (2) The previous investigation related to 31 December 2012.
- (3) No interim valuations have been carried out for the purposes of rule 9.4 since 31 December 2012.

2. Product range

(a) New products

No new products have been introduced during the financial year.

(b) New bonus series

No new bonus series have been introduced during the financial year.

(c) Products withdrawn

No products have been withdrawn during the financial year.

(d) Changes to options or guarantees under existing products

No changes have been made to options or guarantees on existing products during the financial year.

(e) With-profits subfunds

There are no with-profit subfunds.

3. Discretionary charges and benefits

- (1) Not applicable
- (2) Not applicable
- (3) Not applicable
- (4) Not applicable
- (5) Not applicable

Valuation Report as at 31 December 2013 (continued)

- (6) Not applicable
- (7) Not applicable
- (8) Not applicable
- (9) Not applicable
- (10) Not applicable

4. Valuation basis (other than for special reserves)

As at 31 October 2012 the annuities insured by the Company, net of a small outward reinsurance, were 100% reinsured on a quota share basis to the WPSF of PAC. Under this arrangement the reinsured assets have been deposited back with the Company.

For the purpose of reporting interest rates, mortality and expense bases, the following abbreviations are used:

Description	Abbreviation
Reassurance accepted from The Prudential Assurance Company Limited & Prudential Pensions Limited	Reassurance accepted from PAC & PPL
Group Pension Deferred Annuity administration system	GPDA
Deferred Annuity Pension Administration system	DAPA

- (1) The mathematical reserve for annuities in payment is the present value of the annuities.

The mathematical reserve for inflation-linked annuities is, in general, determined without an explicit allowance for future increases in annuity payments, which is consistent with the treatment of the matching assets. The treatment of inflation-linked annuities which are subject to maximum and/or minimum percentage increases is as follows:

- (a) inflation-linked annuities subject to a minimum annual increase of 0% and a maximum annual increase of 5% are, for valuation purposes, treated as being identical to normal inflation-linked annuities.
- (b) inflation-linked annuities subject to a minimum annual increase of 2.5% and a maximum annual increase of 5% are, for valuation purposes, treated as annuities with fixed 5% annual increases.
- (c) inflation-linked annuities subject to a minimum annual increase of 4% and a maximum annual increase of 8.5% are, for valuation purposes, treated as annuities with fixed 8.5% annual increases.

Valuation Report as at 31 December 2013 (continued)

- (d) inflation-linked annuities subject to a minimum annual increase of 3% are, for valuation purposes, treated as annuities with fixed 6% annual increases.
- (e) inflation-linked annuities subject to a minimum annual increase of 0% and a maximum annual increase of 3% arising from Guaranteed Minimum Pension liabilities are, for valuation purposes, treated as annuities with fixed 3% annual increases.

The annuities described under (b), (c) and (d) are included in these returns as linked business. Thus, in particular, Form 56 includes sufficient fixed interest assets to match the corresponding liabilities.

The mathematical reserve for deferred annuities is the present value of the annuity secured to date.

For deferred annuities where benefits include revaluation in deferment in line with inflation, followed by fixed escalation in payment, the revaluation in deferment is generally subject to a minimum annual increase of 0% and a maximum annual increase of 5%. For valuation purposes these are treated as annuities with fixed 5% annual revaluation throughout the deferred period followed by the actual fixed escalation in payment. These annuities are included in these returns as non-linked business.

A separate expense reserve is held. This is calculated as the present value of future expenses, allowing for inflation.

- (2) The FSA (the UK insurance regulator at the time), on the application of the firm, made a direction under Section 148 of the Financial Services and Markets Act 2000. The effect of the direction is to modify the provisions of INSPRU 3.1.35R and IPRU(INS) Appendix 9.3 so that a more appropriate rate of interest will be used for assets taken in combination.

In applying the Section 148 waiver, the yield on property is taken to be the lower of the current rental yield and the "redemption yield", which is the interest rate at which the market value equates to the present value of future rental income and the disposal value. No allowance is made for non-contractual increases in rental income. As an allowance for the risk of falls in value, the disposal value of the property at the end of the lease is taken as 75% of the current market value.

Valuation Report as at 31 December 2013 (continued)

The interest rates used are as follows:

Non-linked

Product code number	Product description	31 December 2013 %	31 December 2012 %
All	All products	3.75	3.40

Index-linked

Product code number	Product description	31 December 2013 %	31 December 2012 %
All	All products (excluding index linked annuities – valued as fixed)	0.06	0.04
All	Index linked annuity – group annuities in payment – valued as fixed Index linked annuity – group deferred annuities – valued as fixed	3.75	3.40

Investment management expenses are allowed for by means of an appropriate deduction from the valuation rate of interest (see 4(6) below). The valuation rates of interest above are shown before the deduction for investment management expenses.

Valuation Report as at 31 December 2013 (continued)

- (3) The allowance for credit risk is calculated as the long-term expected level of defaults plus the long-term credit risk premium plus the long-term downgrade resilience reserve plus an allowance for the impact of additional short-term credit events reflecting the market conditions at the valuation date.

The long-term expected levels of defaults are determined from data supplied by our investment manager, which itself is based upon research carried out by one of the major rating agencies. This analysis, based on actual default experience over a 40 year period, produces mean default rates according to credit quality and term to redemption.

In the event of default it may be possible to recover some capital, especially if the loan is secured. The allowance for recovery (or partial recovery) of the loan varies according to the level of security and the following recovery rates are assumed:

First Mortgage Debenture/Senior Secured	75%
Senior Unsecured	45%
Subordinated Debt	20%

To calculate the aggregate provision for the long-term expected levels of defaults and the long-term credit risk premium, the corporate bond portfolio is broken down according to credit rating and level of security. The default rate for each category is assumed to vary between 100% and 200% of the appropriate mean default rate, reduced by the expected recovery, plus a further amount for credit risk. This further amount for credit risk (the long-term credit risk premium) is determined as the excess over the best estimate level of default, of the 95th percentile of historic cumulative defaults, reduced to allow for the expected recovery of capital and subject to a minimum margin over best estimate of 50%.

The long-term downgrade resilience reserve is determined as the hypothetical impact on the aggregate provision described above of a one-notch downgrade of the entire credit-risky asset portfolio.

Valuation Report as at 31 December 2013 (continued)

For the aggregate of the long-term expected level of defaults, the long-term credit risk premium, and the long-term downgrade resilience reserve, the derived default rates for each level of security are set out below:

Default rates – basis points per annum:

	AAA	AA	A	BBB+	BBB	BBB-	BB and lower
First Mortgage Debenture / Senior Secured							
0 to 10 years	7.4	10.2	16.3	23.4	47.0	95.5	234.2
10 to 20 years	5.7	13.3	20.1	28.6	56.8	97.5	189.8
20 to 30 years	9.6	18.7	22.2	31.4	60.7	93.0	158.4
Over 30 years	11.5	20.6	22.7	31.8	59.4	93.0	158.4
Senior unsecured							
0 to 10 years	16.2	22.4	35.9	51.4	103.3	210.2	515.3
10 to 20 years	12.6	29.3	44.1	62.9	124.9	214.5	417.5
20 to 30 years	21.1	41.1	48.8	69.0	133.6	204.5	348.4
Over 30 years	25.4	45.3	49.9	69.9	130.7	204.5	348.4
Subordinated debt							
0 to 10 years	23.6	32.5	52.3	74.8	150.3	305.8	749.5
10 to 20 years	18.3	42.6	64.2	91.5	181.7	312.0	607.2
20 to 30 years	30.7	59.7	70.9	100.4	194.4	297.5	506.7
Over 30 years	36.9	66.0	72.5	101.6	190.1	297.5	506.7

A deduction is also made to allow for the risk of default of rent on properties. This deduction is calculated in the same way as for corporate bonds (having regard to the credit quality of the relevant tenants), as described above.

The overall allowance for credit risk at 31 December 2013 has been taken to be the allowance for credit risk brought forward from 31 December 2012 but adjusted to allow for changes in asset mix that have occurred during 2013.

The yields shown in Form 48 column 4 were determined in accordance with the requirements of INSPRU 3.1. The risk adjusted yields in Form 57 column 5 were calculated using the method specified in the Section 148 waiver, after allowing for credit risk.

Aggregate yields on the backing assets have been adjusted by 0.78% and 0.90% to allow for credit risk within the non-linked and index-linked portfolios respectively. These credit risk adjustments include margins for prudence.

For the portfolio as a whole this represents an aggregate credit risk assumption of 81 basis points per annum.

Valuation Report as at 31 December 2013 (continued)

Mortality bases used at 31 December 2013 and 31 December 2012

Annuities are generally valued using a percentage of the 00 series PCxA tables for annuitants and pensioners. In order to allow for mortality improvement, future improvement factors are applied from 2000. For males, these future improvement factors are in line with Prudential's own calibration of the CMI 2012 mortality model (CMI 2011 for the 31 December 2012 valuation), with a long term improvement rate of 2.25% p.a. (2.25% p.a. in the 31 December 2012 valuation). For females, future improvement factors are in line with Prudential's own calibration of the CMI 2012 mortality model (CMI 2011 for the 31 December 2012 valuation), with a long term improvement rate of 1.75% p.a. (1.75% p.a. in the 31 December 2012 valuation). The calibration of the CMI 2012 mortality model includes the removal of the negative cohort feature for years of birth after 1947. Compared with the core CMI mortality model, Prudential's calibration:

- (a) blends period improvements between ages 60 to 80 to the long term improvement rate over a 15 year period (compared with a 20 year period in the core CMI model), and
- (b) assumes that cohort improvements dissipate over a 30 year period, or by age 90 if earlier (compared with a 40 year period, or by age 100 if earlier, in the core CMI model).

For impaired lives, an adjustment is made to the annuitant's age to allow for the impairment. The mortality assumptions and expectations of life in the tables above are before the allowance for the impairment has been applied.

In exception to the above, some of the group deferred annuity business has been valued using percentages of single entry tables based on the 92 series tables for annuitants and pensioners, with calendar year 2004 (improvements in line with CMIR17 until 2004). The percentages have been chosen so that the rates used are equivalent to the PNxA double entry tables with future improvement factors of:

- for males, future improvement factors in line with 100% of the CMI medium cohort projections, subject to future improvement factors not being less than 2.25% p.a. until age 90, tapering linearly to zero at age 120;
- for females, future improvement factors in line with 75% of the CMI medium cohort projections, subject to future improvement factors not being less than 1.25% p.a. until age 90, tapering linearly to zero at age 120.

For these contracts, a further deduction of 0.65% from the valuation rate of interest has been made during the deferred period, to allow for expected mortality improvements prior to vesting.

- (5) Not applicable

Valuation Report as at 31 December 2013 (continued)

(6) The renewal expenses per annum used are as follows:

Product code number	Product description	31 December 2013	31 December 2012
All	All products	£22.31 p.a.	£21.57 p.a.

The inflation rate assumed for future expenses is as follows:

Product code number	Product description	31 December 2013	31 December 2012
All	All products	4.00% p.a.	3.50% p.a.

Investment management expenses are allowed for by making a deduction from the valuation rate of interest. The deduction used is as follows:

Product code number	Product description	31 December 2013	31 December 2012
All	All products	0.057% p.a.	0.057% p.a.

The valuation rates of interest in 4(2) (and the asset yields in Form 48 and Form 57) are shown before the deduction for investment management expenses.

Outgo on property maintenance costs and leases is allowed for directly in the valuation rates of interest used (and the asset yields shown in Form 48 and Form 57 are shown after this deduction).

(7) Not applicable

(8) Not applicable

(9) No lapses have been allowed for in the valuation.

Valuation Report as at 31 December 2013 (continued)

(10) For joint life policies, the assumptions for the proportion married at the death of the first life are as follows:

	31 December 2013	31 December 2012
<u>Annuities in payment</u>		
When single at retirement	10%	10%
When married at retirement	100%	100%
When average married assumption applies	80%	80%
Remarriage assumption for spouse	5%	5%
<u>Deferred annuities</u>		
When single at commencement	75%	75%
When married at commencement	95%	95%
When average married assumption applies	80%	80%
Remarriage assumption for spouse	5%	5%

There are no other material basis assumptions that are not stated elsewhere.

(11) Derivative contracts held as at 31 December 2013 comprised:

- i) Contracts to swap fixed US Dollars for fixed UK Sterling;
- ii) Contracts to swap fixed Euros for fixed UK Sterling;
- iii) Contracts to swap floating UK Sterling LIBOR for fixed UK Sterling;
- iv) Contracts to swap fixed UK Sterling for floating UK Sterling LIBOR;
- v) Contracts to swap inflation-linked RPI UK Sterling for fixed UK Sterling;
- vi) Contracts to swap inflation-linked UK Sterling property income for fixed UK Sterling;
- vii) Contracts to swap fixed UK Sterling for inflation-linked UK Sterling RPI/LPI;
- viii) Contracts to swap future fixed/floating UK sterling for future inflation-linked UK Sterling RPI/LPI;
- ix) Contracts to take sovereign credit risk in return for ongoing premiums.
- x) FFX Contracts to swap fixed, floating LIBOR and Credit default premium cashflows for fixed UK Sterling

The effect of the contracts under i) is to convert cashflows from fixed US Dollar denominated bonds into fixed UK Sterling cashflows.

The effect of the contracts under ii) is to convert cashflows from fixed Euro denominated bonds into fixed UK Sterling cashflows.

Valuation Report as at 31 December 2013 (continued)

The effect of the contracts under iii) is to convert cashflows from UK Sterling floating rate Libor assets into fixed UK Sterling cashflows.

The effect of the contracts under iv) combined with contracts under v) is to lengthen the duration of the fixed portfolio.

The effect of the contracts under v) is to convert cashflows from inflation-linked RPI bonds into fixed UK Sterling cashflows.

The effect of the contracts under vi) is to convert cashflows from RPI inflation-linked property rental payments into fixed UK Sterling cashflows.

The effect of the contracts under vii) is to convert fixed UK Sterling assets into UK Sterling RPI/LPI inflation-linked cashflows.

The effect of the contract under viii) is to convert future fixed/floating UK Sterling cashflows into future RPI/LPI inflation-linked cashflows.

The effect of the contracts under ix) is to take sovereign credit risk in return for a premium.

The effect of the contract under x) is to convert various currency cashflows from floating rate Libor bonds, fixed rate bonds and a premium for providing protection on the default of a bond into fixed UK Sterling cashflows. The cashflows involved in these arrangements were included in the aggregate cashflows from the portfolio in order to derive the aggregate yield on the portfolio. This is in accordance with the Section 148 waiver.

No options are held and hence no out-of-the-money derivatives have been used to back liabilities.

The yields shown in Form 48 column 4 were determined in accordance with the requirements of INSPRU 3.1 and hence differ from the yields calculated in accordance with the Section 148 waiver.

- (12) There were no changes in valuation methodology arising from changes in INSPRU valuation rules effective from 31 December 2006.

5. Options and guarantees

(1) Not applicable

(2) Not applicable

(3) Not applicable

(4) Some inflation linked annuities are subject to maximum and minimum percentage increases. The valuation of this business is described in 4(1). An additional reserve of £0.5m is held at the valuation date to cover the risk of negative inflation.

Valuation Report as at 31 December 2013 (continued)

6. Expense reserves

- (1) The aggregate amount arising during the twelve months after the valuation date from implicit and explicit expense reserves made in the valuation to meet expenses are:

	£m
Per policy expenses	2.9
Investment management expenses	4.1
Total	7.0

Outgo on property maintenance costs and leases is allowed for directly in the valuation rates of interest used (and the asset yields shown in Form 48 and Form 57 are shown after this deduction).

- (2) Not applicable
- (3) The maintenance expenses shown at line 14 of Form 43 are £8.3m. These expenses include costs whose payment is contingent on the emergence of statutory surplus emerging and, as such, no reserve is held for them.
- (4) With the exception of a small volume of increments to existing policies, the Company does not expect to write any new business in the twelve months following the valuation date. Therefore no new business expense overrun reserve is required.
- (5) Although the Company is effectively closed to new business, the expense reserves in (1) above are calculated on the implicit assumption that the Company will continue to write new business (on the basis that new business that would have been written by the Company in previous years, continues to be written elsewhere in the Prudential Group).

In the first instance, expense reserves are calculated on the assumption that Prudential's UK insurance operations will continue to write new business indefinitely and hence that there will be no loss of economies of scale. In this scenario, the amount of the expense loading over the remaining lifetime of the contracts in force at the valuation date is £62m.

In order to allow for the possibility that the firm will cease to transact new business twelve months after the valuation date, the expense loading is recalculated on the assumption that, over a two year period, unit costs would be reduced by 20% and that loss of economies of scale would result in overall expenses thereafter being cut more slowly than the rate at which policies run off. If this revised calculation results in a higher reserve than described in the paragraph above, then the difference is held as an additional reserve. In addition, the costs associated with closing to new business, such as redundancy costs or the costs of terminating management agreements, are estimated. To the extent that these costs exceed the surplus expected to arise over the following year on prudent

Valuation Report as at 31 December 2013 (continued)

assumptions from existing business a further additional reserve is held.

At the valuation date, an additional reserve of £23.4m is held for the impact of closing to new business.

(6) No expenses have been treated as non-attributable.

7. Mismatching reserves

(1) All the mathematical reserves are payable in sterling and the assets which match the liabilities are sterling assets. There are some US Dollar and Euro denominated assets which, in conjunction with specific swap derivative contracts, effectively produce income in UK Sterling. See 4(11) for details.

(2) Not applicable

(3) Not applicable

(4) The most onerous scenario under INSPRU 3.1.16R was:

(i) a fall in property values of 20% plus a fall in rental income of 10%;

(ii) a fall in yield on all fixed interest securities of 0.69%, which is the percentage point fall equal to 20% of the long-term gilt yield at the valuation date, and;

(iii) a fall of 0.01% in the indexed-linked real security yield in conjunction with a fall of 0.67% in the inflation rate such that the overall fall in the nominalised yield is equal to 0.69%.

(5) There were no significant territories at the valuation date.

(6) In respect of the scenario described under (4) above;

(a) No resilience capital requirement was necessary.

(b) The increase in the aggregate amount of the long-term insurance liabilities was £145m.

(c) The increase in the aggregate amount of assets backing these liabilities was £167m.

(7) A reserve of £128m was held arising from the test on assets in INSPRU 1.1.34R(2).

Valuation Report as at 31 December 2013 (continued)

This reserve was set at a level which was sufficient to ensure that it covered the results of projecting:

- (i) the risk adjusted cashflows of the assets backing the liabilities, and;
- (ii) the future liability payments on the valuation assumptions.

In carrying out this test, the asset cashflows have been adjusted to allow for a level of defaults consistent with the Company's credit risk assumptions.

In determining the risk adjusted cashflows of the assets, two scenarios are tested:

- Scenario A: In any year where asset income exceeds liability outgo, the excess is invested in a notional cash asset, and this cash asset is assumed to accumulate at 97.5% of the maximum reinvestment rate specified in INSPRU 3.1.45R. In any year when asset income is insufficient to meet liabilities, the cash reserve is used to meet the shortfall. In the event that the cash reserve is reduced to below zero, then the shortfall is assumed to be borrowed at a rate 2.0% higher than 97.5% of the maximum reinvestment rate.
- Scenario B: In any year where asset income exceeds liability outgo, the excess is invested in a notional cash asset, and this cash asset is assumed to accumulate at the valuation rate of interest (as specified in 4(2)). In any year when asset income is insufficient to meet liabilities, the cash reserve is used to meet the shortfall. In the event that the cash reserve is reduced to below zero, then the shortfall is assumed to be borrowed at a rate 1.2% higher than the valuation rate of interest.

The reserve held is that required to satisfy the more onerous of these two scenarios.

8. Other special reserves

Other special reserves are as follows:

A reserve of £42m is held to cover general contingencies.

9. Reinsurance

Long term business is reassured on a facultative basis to a reinsurer who is authorised to carry on business in the UK.

- (1) Not applicable
- (2) Details of any reinsurance treaties held as at 31 December 2013 which satisfy criteria (a), (b) or (c) are as follows:

Valuation Report as at 31 December 2013 (continued)

(d) Reinsurer	(e) Nature of Cover	(f) Premiums £m	(g) Deposits back at the valuation date £m	(h) Open/ Closed	(i) Amount of any Undischarged Obligation	(j) Reserves Ceded £m	(k) Retention
The Prudential Assurance Company Limited (PAC)	PAC reinsures 100% of the net liabilities in respect of PAL's liabilities, except for policies reinsured under pre existing treaties.	1.5	5,671.8	Open	None	5,735.7	None

Valuation Report as at 31 December 2013 (continued)

- (l) The Company above is authorised to carry on insurance business in the United Kingdom.
 - (m) PAC is authorised to carry on insurance business in the United Kingdom.
 - (n) The treaty is not subject to any material contingencies.
 - (o) The net liability includes no allowance for the refund of any reinsurance commission.
 - (p) Not applicable
- (3) Not applicable

10. Reversionary (or annual) bonus

Supplementary notes to the returns

Form 2

0201 Waivers under Section 148, Financial Services and Markets Act 2000

(1502380) The FSA (the UK insurance regulator at the time), on the application of the firm, made a direction under section 138A of the Financial Services and Markets Act 2000 in August 2012. The effect of the direction is to modify the provisions of INSPRU 3.1.35R and IPRU (INS) Appendix 9.3 so that a more appropriate rate of interest is used for certain assets taken in combination. This direction ends on 31 March 2014 or, if earlier, the date the relevant rule is revoked or no longer applies to the firm (in whole or in part). This waiver is a renewal of the waiver direction 771848 which ended on 31 October 2012.

Form 13

Notes 1301 to 1307 apply to the other than long term business fund.

1301 The Company held no unlisted securities at year end.

1302 The Company held £48m in hybrid securities.

1304 Amounts due to or from the Company have been set off to the extent permitted by generally accepted accounting principles.

1305 The maximum permitted exposure to any single counterparty has been set in accordance with the counterparty limits detailed in the various Prudential Sourcebooks. Therefore exposures to individual non-approved counterparties have been restricted to a maximum of 5% of the business amount. No non-approved counterparty exposure during the year exceeded these limits.

1306 No counterparty exposure at the year end exceeded 5% of the business amount.

1307 The Company has an exposure of £215m to “secured obligations”. This figure has not been deducted from the admissibility testing for 31 December 2013, as the original test covered all exposures within the limits set.

Notes 1308 to 1313 apply to the long term business fund.

1308 The Company held £297m in unlisted securities and units of beneficial interest in collective investment schemes with an aggregate value of £33m.

1309 The Company held £156m in hybrid securities.

1310 Amounts due to or from the Company have been set off to the extent permitted by generally accepted accounting principles.

Supplementary notes to the returns (continued)

Form 13 (continued)

1312 No counterparty exposure at the year end exceeded 5% of the long term business amount.

1313 The Company has an exposure of £215m to “secured obligations”. This figure has not been deducted from the admissibility testing for 31 December 2013, as the original test covered all exposures within the limits set.

Miscellaneous adjustments to assets	17,921
Line 101 on Form 13	<u>153,783</u>

1319 The maximum permitted exposure to any single counterparty has been set in accordance with the counterparty limits detailed in the various Prudential Sourcebooks. Therefore exposures to individual non-approved counterparties have been restricted to a maximum of 5% of the business amount. No non-approved counterparty exposure during the year exceeded these limits.

1321 Other differences in valuation of assets

	2013 £'000s
<i><u>Total long term business assets</u></i>	
Assets valued on a different basis than that in the financial statements	(950)
Line 98 on Form 13	<u>(950)</u>

Supplementary notes to the returns (continued)

Form 14

1401 The long term fund held a number of interest rate swaps, inflation swaps, credit default swaps, forwards, and foreign currency swaps during the year. The swaps involved the exchange of cash flows and not the underlying principal amount. No provision for adverse change is required, as all derivatives that impose an obligation on the fund are strictly covered.

1402 (a) In the normal course of business certain reinsurance liabilities were secured by a floating charge, ranking these liabilities equally with amounts due under unsecured direct (non-reassurance) policies, over the long term insurance assets of the Company. The gross amounts secured by charges of this nature and included net in Form 14 line 11 was £53m. The whole of the amount at F13 line 89 is subject to charge.

(b) Increases in the values of assets of the long term fund do not attract tax, and therefore no provision, potential or otherwise, has been made for any liability to tax which might arise if the Company disposed of its assets at the values stated in this return.

(c) There were no guarantees, indemnities or other contractual commitments other than in the ordinary course of insurance business and in respect of related companies.

1405 Details of other adjustments to liabilities

	2013 £'000s
Additional reserves held in long term fund	(313)
Deferred tax held on life tax transitional arrangements	(134)
Deposit back liability netted off Index Linked assets in the regulatory return	135,862
Miscellaneous adjustments to liabilities	17,921
Line 74 on Form 14	<u>153,336</u>

Form 15

1501 The other than long term fund held a number of inflation swaps during the year. The swaps involved the exchange of cash flows and not the underlying principal amount. No provision for adverse change is required, as all derivatives that impose an obligation on the fund are strictly covered.

1502 (a) There were no charges attributable to the other than long term business assets.

(b) The total potential liability to taxation on capital gains which might arise if the Company disposed of its assets was £Nil.

(c) There were no contingent liabilities at the year end.

Supplementary notes to the returns (continued)

Form 15 (continued)

- (d) There were no guarantees, indemnities or other contractual commitments other than in the ordinary course of insurance business and in respect of related companies.

1507 Details of other adjustment in liabilities

	2013 £'000s
Miscellaneous adjustments to liabilities	<u>(24)</u>
Line 83 on Form 15	<u><u>(24)</u></u>

Form 16

- *1601* Revenue account items are translated at rates ruling on the transaction date.
- *1603* Balances in line 21 relate to management expenses offset by interest on corporation tax refunded by HMRC.

Form 17

- *1701* There is no Form 17 as there is no requirement.

Form 40

- *4008* Management services are provided to the Company for day to day administration from The Prudential Assurance Company Ltd, M&G Investment Management Ltd, M&G Real Estate Ltd, PPM America Inc., Prudential UK Services Ltd, Prudential Services Ltd, Prudential Financial Planning Ltd and Prudential Distribution Ltd, all being group companies.
- *4009* The Company has reinsurance agreements with a related company, The Prudential Assurance Company Ltd, in respect of non-participating approved pension annuity contracts. During the year, claims amounting to £314m were ceded under these reinsurance agreements. A premium amounting to £2m was ceded. The reinsurance included in the Return, relating to this business, amount to £5,736m asset for the reinsurance ceded at the year end.

There were no other material intra-group transactions.

Supplementary notes to the returns (continued)

Form 48

- *4802* There are 9 assets where payment of interest is in default. The expected interest from these assets has been reduced to nil.
- *4803* Securities with an issuer option to redeem early are assumed to redeem at the next call date. The only exception to this are Government perpetual bonds (which can redeem at any time), and for these securities we assume that cashflows continue for 150 years.

Form 49

- *4901* Credit ratings used on Form 49 are the second highest of three external rating agencies, namely Fitch, S&P and Moody's.

Form 51

- *5105* The amount of double counting of policies on Forms 51 and 54 combined is 14,126.
- *5106* Annuities included in Forms 51 and 54 are categorised depending on the type of escalation of benefits once an annuity is in payment. Form 51 includes annuities that increase at a guaranteed fixed rate and Form 54 includes annuities where benefits are dependent on changes in UK inflation. Deferred annuities with revaluation in line with inflation in deferment and fixed increases in payment are included in Form 51.

Form 54

- *5405* The amount of double counting of policies on Forms 51 and 54 combined is 14,126.

Form 56

- *5601* Credit ratings used on Form 49 are the second best of three external rating agencies, namely Fitch, S&P and Moody's.

Form 57

The FSA (the UK insurance regulator at the time), on the application of the firm, made a direction under section 148 of the Financial Services and Markets Act 2000 in August 2012. The effect of the direction is to modify the provisions of INSPRU 3.1.35R and IPRU(INS) Appendix 9.3 so that a more appropriate rate of interest is used for certain assets taken in combination.

Supplementary notes to the returns (continued)

Form 57 (continued)

Asset yields before risk adjustment and the yields adjusted for risk shown in Form 57 as required by waiver 1502380 (effective from 1 November 2012, see note *0201*), are as follows:

Product group	Risk adjusted yield on matching assets (Form 57 column 5)	Corresponding asset yield
Form 51: Immediate & deferred annuities	3.85%	4.63%
Form 51: Additional reserves non-profit OB – policy related expenses	0.06%	0.96%

Form 58

5803 There is a difference between line 49 and Form 2 line 11 of £76k. This difference relates to the inadmissible assets shown on Form 13 (Long term Business) line 93.

PRUDENTIAL ANNUITIES LIMITED

Global business

Returns for the year ended 31 December 2013

Directors' Certificate required by rule 9.34 of the Accounts and Statements Rules.

We certify:

1. (a) that the return has been properly prepared in accordance with the requirements in IPRU(INS), GENPRU and INSPRU as modified by a waiver detailed in supplementary note 0201 issued under section 138A of the Financial Services and Markets Act 2000 and section 68 of the Insurance Companies Act 1982 which continues to have effect; and:
 - (b) we are satisfied that:
 - (i) throughout the financial year in question, the insurer has complied in all material respects with the requirements of SYSC and PRIN as well as the provisions of IPRU(INS), GENPRU, INSPRU; and
 - (ii) it is reasonable to believe that the insurer has continued so to comply subsequently, and will continue so to comply in future.
2. (a) that in our opinion, premiums for contracts entered into during the financial year and the resulting income earned are sufficient, under reasonable actuarial methods and assumptions, and taking into account the other financial resources of the insurer that are available for the purpose, to enable the insurer to meet its obligations in respect of those contracts and, in particular, to establish adequate mathematical reserves;
 - (b) that the sum of the mathematical reserves and the deposits received from reinsurers, as shown in Form 14, constitute proper provision at the end of the financial year in question for the long-term insurance liabilities (including all liabilities arising from deposit back arrangements, but excluding other liabilities which had fallen due before the end of the financial year) including any increase in those liabilities arising from a distribution of surplus as a result of an actuarial investigation as at that date into the financial condition of the long-term insurance business;
 - (c) that we have, in preparing the return, taken and paid due regard to advice in preparing the return from every actuary appointed by the insurer to perform the actuarial function in accordance with SUP 4.3.13R.

Returns for the year ended 31 December 2013

Independent auditor's report to the Directors pursuant to the rule 9.35 of the Interim Prudential Sourcebook for Insurers ("IPRU(INS)")

We have examined the following documents prepared by the insurer pursuant to the Accounts and Statements Rules set out in Part I and Part IV of Chapter 9 to IPRU(INS) the Interim Prudential Sourcebook for Insurers, GENPRU the General Prudential Sourcebook and INSPRU the Insurance Prudential Sourcebook, ("the Rules") made by the Prudential Regulation Authority under section 137G of the Financial Services and Markets Act 2000:

- Forms 2, 3, 13 to 17, 40 to 43, 48, 49, 56, 58 and 60, (including the supplementary notes) on pages 1 to 57 ('the Forms');
- the statement required by IPRU(INS) rule 9.29 on pages 62 to 63 ('the Statement'); and
- the valuation report required by IPRU(INS) rule 9.31(a)(i) on pages 34 to 50 ("the valuation report").

We are not required to examine and do not express an opinion on:

- Forms 46, 47, 50, 51, 54 and 57 (including the supplementary notes) on pages 19 to 57;
- the statement required by IPRU(INS) rules 9.30 on page 64; or
- the certificate required by IPRU(INS) rule 9.34(1) on page 58 ('the certificate').

This report is made solely to the insurer's directors, as a body, in accordance with the requirements of IPRU(INS) rule 9.35. We acknowledge that the directors are required to submit this report to the PRA, to enable the PRA to verify that an auditor's report has been commissioned by the insurer's directors and issued in accordance with the requirements of IPRU(INS) rule 9.35 and to facilitate the discharge by the PRA of its regulatory functions in respect of the insurer, conferred on the PRA by or under the Financial Services and Markets Act 2000. Our work (including our examination) has been undertaken so that we might state to the insurer's directors, as a body, those matters we are required to state to them in an auditor's report issued pursuant to IPRU(INS) rule 9.35 and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the insurer and the insurer's directors as a body, for our work (including our examination), for this report, or for the opinions we have formed.

PRUDENTIAL ANNUITIES LIMITED

Global business

Independent auditor's report to the Directors pursuant to the rule 9.35 of the Interim Prudential Sourcebook for Insurers ("IPRU(INS)") (continued)

Respective responsibilities of the Insurer and its auditors

The insurer is responsible for the preparation of an annual return (including the Forms, the Statements and the valuation reports) under the provisions of the Rules. The requirements of the Rules have been modified by a direction issued under section 138A of the Financial Services and Markets Act 2000 dated August 2012. Under IPRU(INS) rule 9.11 the Forms, the Statement and the valuation report are required to be prepared in the manner specified by the Rules and to state fairly the information provided on the basis required by the Rules.

Under IPRU(INS) rule 9.11 the Forms, the Statements and the valuation reports are required to be prepared in the manner specified by the Rules and to state fairly the information provided on the basis required by the Rules.

The methods and assumptions determined by the insurer and used to perform the actuarial investigation as set out in the valuation reports, are required to reflect appropriately the requirements of INSPRU 1.2.

- It is our responsibility to form an independent opinion as to whether the Forms, the Statements and the valuation reports meet these requirements, and to report our opinions to you. We also report to you if, in our opinion:
- adequate accounting records have not been kept or returns adequate for our audit have not been received from branches not visited by us; or
- the Forms, the Statements and the valuation reports are not in agreement with the accounting records and returns; or
- we have not received all the information we require for our examination.

Basis of opinion

We conducted our work in accordance with Practice Note 20 'The audit of insurers in the United Kingdom (Revised)' issued by the Auditing Practices Board. Our work included examination, on a test basis, of evidence relevant to the amounts and disclosures in the Forms, the Statements and the valuation reports. The evidence included that previously obtained by us relating to the audit of the financial statements of the insurer for the financial year. It also included an assessment of the significant estimates and judgements made by the insurer in the preparation of the Forms, the Statement and the valuation reports.

PRUDENTIAL ANNUITIES LIMITED

Global business

Independent auditor's report to the Directors pursuant to the rule 9.35 of the Interim Prudential Sourcebook for Insurers ("IPRU(INS)") (continued)

We planned and performed our work so as to obtain all the information and explanations which we considered necessary in order to provide us with sufficient evidence to give reasonable assurance that the Forms, the Statements and the valuation reports are free from material misstatement, whether caused by fraud or other irregularity or error, and comply with IPRU(INS) rule 9.11.

In accordance with IPRU(INS) rule 9.35(1A), to the extent that any document, Form, Statement, analysis or report to be examined under IPRU(INS) rule 9.35(1) contains amounts or information abstracted from the actuarial investigation performed pursuant to IPRU(INS) rule 9.4, we have obtained and paid due regard to advice from a suitably qualified actuary who is independent of the insurer.

Opinion

In our opinion:

- i) the Forms, the Statements and the valuation reports fairly state the information provided on the basis required by the Rules as modified and have been properly prepared in accordance with the provisions of those Rules; and
- ii) the methods and assumptions determined by the insurer and used to perform the actuarial investigation as set out in the valuation reports appropriately reflect the requirements of INSPRU 1.2.

PRUDENTIAL ANNUITIES LIMITED

Returns for the year ended 31 December 2013

Statement pursuant to the Interim Prudential Sourcebook for Insurers (IPRU(INS)) rule 9.29

(a) Investment guidelines

As requested by Rule 9.29 of the Interim Prudential Sourcebook, the investment guidelines for the use of derivative contracts for both long term and other than long term funds are set out below. These are fully explained in the Company's Investment Management Agreement with its fund managers and are consistent with the investment strategy.

- (i) Derivatives are used for the purpose of efficient portfolio management or to reduce risk, specific examples being to implement tactical asset allocation changes around the strategic benchmark, hedge cash flows, or control the risk profile of an identified strategy.
- (ii) A number of restrictions on the use of derivatives have been agreed with the Company's fund managers and can only be overruled by prior agreement between the two parties:
 - all derivatives that impose obligations on the fund must be strictly covered.
 - all derivative contracts must satisfy the definition of approved under Rule 3.2.5 of the Prudential sourcebook for Insurers (INSPRU).
 - the maximum allowable exposure to counterparties should not be exceeded.
 - only certain permitted exchanges and contracts can be used.
- (iii) During the year the Company has used interest rate, currency, credit default and inflation-linked swaps in the long term business and interest rate swaps in the other than long term business.

The Company has previously used redeemable convertible corporate bonds. These bonds have not been categorised as derivative contracts as the derivative element is minimal and have therefore not been reported on form 17. This year the value is £Nil as there are none held.

(b) Derivatives where exercise is unlikely.

There are no specific guidelines for the use of contracts not reasonably likely to be exercised. However the Investment Management Agreement only allows the use of derivatives for the purpose of efficient portfolio management or to reduce risk and the Company's investment manager's work within these constraints.

(c) Quantification of derivatives in (b) above

There was zero exposure to out of the money call options / warrants.

(h) Derivatives not covered by the definition of an admissible derivative contract in the Prudential Sourcebooks.

There were no derivative contracts held during 2013 that did not satisfy this criteria.

(i) Consideration for granting rights under derivative contracts

No rights under derivative contracts have been granted.
